EXPLANATION

ATLANTIC	PACIFIC
OTHER FLATFISH - flounders, greysole, skate, turbot, witch, yellowtail	- flounders, skate
OTHER ESTUARIAL - eel, shad, sea-bass or -perch, sturgeon, tomcod	- eulachon, sea-bass or -perch, smelt, sturgeon
OTHER SHELLFISH - crab, mussel, winkle	- abalone, octopus, prawn, shrimp

FISHERIES OF CANADA - JANUARY 1956

CANADA

Landings in the sea-fisheries of Canada in January amounted to 137,658,000 lb. and were valued at \$3,502,000. The comparable figures for the same month of 1955 were 132,372,000 lb. and \$3,258,000, so that there was an increase of 4% in volume and of 7% in value this year.

PACIFIC

In British Columbia the value of the January catch -- \$1,439,000 -- was 6% higher than the January, 1955 figure of \$1,351,000. Activity was much the same as a year ago, with 91% of the monthly value coming from the herring fishery. In general the value of landings of shellfish was higher this year.

ATLANTIC

The Atlantic January catch -- 43,433,000 lb. worth \$2,063,000 compared to 33,234,000 lb. worth \$1,907,000 last year -- was higher by 31% in volume and by 8% in value.

In both Newfoundland and Nova Scotia the haddock fishery was particularly successful. The New Brunswick sardine catch was much greater this January. Landings of lobsters have not yet reached the 1955 level.

STOCKS

At the end of January stocks of frozen fish in Canada amounted to 30,931,000 lb., of which 29,208,000 lb. were frozen fresh and 1,723,000 lb. frozen smoked. Total holdings were lower by 7,792,000 lb. (20%) fresh and by 234,000 lb. (12%) smoked than those at December 31st, 1955. Compared to January 31st, 1955 inventories current stocks were lower by 11,186,000 lb. (28%) fresh and by 385,000 lb. (18%) smoked.

EXPORTS

During 1955 Canadian fish and fish products to the value of \$128,816,000 were exported -- approximately 3% less than the \$132,514,000 sales reported in 1954. Exports of fish blocks to the United States totalled \$6,355,000 in 1955. Spurred by an increase in shipments to Puerto Rico, sales of salt cod were appreciably higher than in 1954. Export sales of lobsters to the U.S. market rose by 22% from \$13.7 millions in 1954 to \$16.7 millions in 1955. However, exports of canned salmon were lower by 32% -- \$16,242,000 in the year just ended as against \$23,968,000 in 1954.

LA PECHE AU CANADA - JANVIER 1956

CANADA

Les débarquements maritimes de poisson en janvier se sont élevés à 137,658,000 livres, évaluées à \$3,502,000. Les chiffres correspondants d'un an plus tôt étaient de 132,372,000 livres et \$3,258,000, de sorte que l'année a vu une augmentation de 4 p. 100 en volume et de 7 p. 100 en valeur.

ATLANTIQUE

La prise de janvier dans l'Atlantique (43,433,000 livres d'une valeur de \$2,063,000 en comparaison de 33,234,000 livres valant \$1,907,000 l'année dernière) a été supérieure de 31 p. 100 en volume et de 8 p. 100 en valeur.

A Terre-Neuve et en Nouvelle-Ecosse, la pêche de l'aiglefin a été particulièrement fructueuse. La prise de sardines au Nouveau-Brunswick a été beaucoup plus grande en janvier cette année. Les débarquements de homard n'ont pas encore atteint le niveau de 1955.

PACIFIQUE

En Colombie-Britannique, la valeur de la prise de janvier (\$1,439,000) a été supérieure de 6 p. 100 à celle de janvier 1955 (\$1,351,000). L'activité a été à peu près la même qu'il y a un an, et 91 p. 100 de la valeur de la prise du mois provenant du homard. En général, la valeur des débarquements de crustacés a été supérieure cette année.

STOCKS

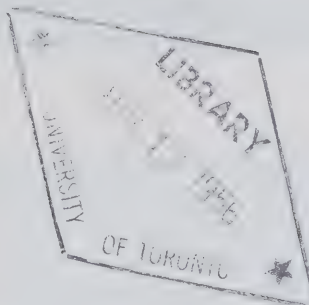

A la fin de janvier, les stocks de poisson congelé au Canada s'élevaient à 30,931,000 livres, dont 29,208,000 livres frais et 1,723,000 fumé. Les approvisionnements totaux étaient inférieurs de 7,792,000 livres (20 p. 100) pour le poisson frais et de 234,000 livres (12 p. 100) pour le poisson fumé, à ceux du 31 décembre 1955. Au regard des stocks du 31 janvier 1955, les approvisionnements actuels sont inférieurs de 11,186,000 livres (28 p. 100) pour le poisson frais et de 385,000 livres (18 p. 100) pour le poisson fumé.

EXPORTATIONS

Au cours de 1955, le Canada a exporté du poisson et des produits du poisson d'une valeur de \$128,816,000, soit environ 3 p. 100 de moins que les \$132,514,000 de 1954. Les exportations de poisson en blocs aux Etats-Unis se sont élevés à \$6,355,000 en 1955. Poussées par une augmentation des expéditions à Porto-Rico, les ventes de morue salée ont été considérablement supérieures à celles de 1954. Les exportations de homard aux marchés des Etats-Unis se sont accrues de 22 p. 100 (de \$13.7 millions en 1954 à \$16.7 millions en 1955). Toutefois, les exportations de saumon en boîte ont diminué de 32 p. 100 (\$16,242,000 pour l'année qui vient de se terminer contre \$23,968,000 en 1954).

FISHERIES OF CANADA - FEBRUARY 1956

CANADA

During February landings in the sea-fisheries of Canada amounted to 212,-032,000 lb. and were valued at \$4,480,000 -- 275 and 135% higher respectively than the 56,564,000 lb. of fish worth \$1,903,000 reported in February, 1955.

PACIFIC

On our West Coast the record herring catch continued to dominate the picture, with a landed value in February of \$2,287,000. The comparable total a year ago was only \$252,000, and at that time this fishery was closed down to ensure adequate spawning stocks. It would seem the desired result was obtained.

ATLANTIC

On the Atlantic Coast the total catch -- 47,696,000 lb. valued at \$2,008,-000 -- was greater by 45 and 39% respectively than the 32,926,000 lb. worth \$1,447,000 recorded in February, 1955.

The most significant increase appears to be in the haddock fishery, both in Newfoundland and Nova Scotia. To date the lobster catch is running ahead of last year's in value, although slightly lower in quantity.

STOCKS

On February 29th stocks of frozen fish in Canada totalled 33,241,000 lb., and of this amount 31,599,000 lb. were frozen fresh and 1,642,000 lb. frozen smoked. Total holdings were lower by 8,315,000 lb. (21%) fresh and by 103,000 lb. (6%) smoked than those of January 31st, 1956. Compared to the end of February, 1955, stocks current holdings of frozen fresh fish were approximately the same, but inventories of frozen smoked fish were lower by 602,000 lb. (27%).

EXPORTS

In January fish and fish products worth \$9,540,000 were exported -- 6% less than the \$10,169,000 sold abroad in the first month of 1955. Almost the whole of this deficit can be attributed to lower sales of meal and oils.

LA PECHE AU CANADA - FEVRIER 1956

CANADA

Au cours de février, les débarquements maritimes de poisson au Canada se sont élevés à 212,032,000 livres, évaluées à \$4,480,000 -- chiffres supérieurs de 275 et de 135 p. 100 respectivement aux 56,564,000 livres de poisson valant \$1,903,000 enregistrées en février 1955.

PACIFIQUE

Sur la côte ouest, la prise record de hareng a continué à dominer le tableau, les débarquements ayant atteint une valeur de \$2,87,000 en février. Le total correspondant, l'an dernier, n'était que de \$252,000, et à l'époque, cette pêche a été fermée pour assurer une multiplication suffisante. Il semble que le résultat désiré a été obtenu.

ATLANTIQUE

Sur la côte de l'Atlantique, la prise totale (47,696,000 livres évaluées à \$2,008,000) dépassait de 45 et de 39 p. 100 respectivement les 32,926,000 livres valant \$1,447,000 enregistrées en février 1955.

L'augmentation la plus importante semble être survenue dans la pêche de l'aiglefin, à Terre-Neuve et en Nouvelle-Ecosse. A date, la prise de homard devance celle de l'année dernière en valeur, bien qu'elle soit légèrement inférieure en quantité.

STOCKS

Au 29 février, les stocks de poisson congelé au Canada s'élevaient à 33,241,000 livres, dont 31,599,000 livres frais et 1,642,000 fumé. Les approvisionnements totaux étaient inférieurs de 8,315,000 livres (21 p. 100) pour le poisson frais et de 103,000 livres (6 p. 100) pour le poisson fumé, à ceux du 31 janvier 1956. Au regard des stocks de la fin de février 1955, les approvisionnements actuels de poisson congelé frais étaient à peu près les mêmes, mais ceux de fumé étaient inférieurs de 602,000 livres (27 p. 100).

EXPORTATIONS

En janvier, le Canada a exporté pour \$9,540,000 de poisson et de produits du poisson, soit 6 p. 100 de moins que les \$10,169,000 du premier mois de 1955. Presque tout ce recul peut être attribué aux ventes moins fortes de farine et d'huiles.

OTHER SHELLFISH - crab, mussel, winkle	- abalone, octopus, prawn, shrimp

FISHERIES OF CANADA - MARCH 1956

CANADA

In March landings in the sea-fisheries of Canada amounted to 107,918,000 lb. -- 136 p.c. higher than the 45,680,000 lb. taken in March, 1955 -- and were valued at \$2,948,000 -- 55 p.c. higher than the \$1,908,000 recorded in the same month of last year.

During the first quarter of this year the value of the catch jumped 55% to \$10,932,000 from the comparable 1955 value of \$7,056,000.

PACIFIC

Landings of fish on our Pacific Coast reached record proportions in March, and were valued at \$1,152,000. This was due almost wholly to an extremely heavy volume of herring being caught in the first eight days of the month before the season closed.

The increased value of the landings of lingcod, clams, shrimps and oysters helped to make up the record total.

ATLANTIC

On our East Coast the total catch -- 40,210,000 lb. worth \$1,796,000 -- was 1% lower in volume but 8% more valuable than the 40,557,000 lb. worth \$1,664,000 reported in March, 1955.

In the first three months of this year landings have risen to 132,510,000 lb. from the 106,710,000 lb. taken in the same period of 1955, and the total value has jumped to \$5,869,000 from \$5,005,000.

The biggest increase appears to be in the haddock fishery in Newfoundland where the reported value of \$869,000 is 90 p.c. higher than the comparable figure for 1955.

STOCKS

On March 31st stocks of frozen fish in Canada amounted to 30,368,000 lb., of which 27,856,000 lb. were frozen fresh and 2,412,000 lb. frozen smoked. Total holdings were lower by 3,969,000 lb. (12%) fresh and by 747,000 lb. (45%) smoked than those of February 29th, 1956. Compared to the end of March, 1955 stocks current holdings of frozen fresh fish were higher by 6,372,000 lb. (30%) and those of frozen smoked fish higher by 367,000 lb. (18%).

EXPORTS

In the first two months of this year fish and fish products worth \$19,553,000 were exported -- approximately 3 p.c. more than the \$19,043,000 sold abroad in the same period of last year.

LA PECHE AU CANADA - MARS 1956

CANADA

En mars, les débarquements des pêches maritimes canadiennes se sont élevés à 107,918,000 livres, soit 136 p. 100 de plus que les 45,680,000 de mars 1955, et ont été évalués à \$2,948,000, c'est-à-dire 55 p. 100 de plus que les \$1,908,000 de l'année dernière.

Au cours du premier trimestre, la valeur de la prise a bondi de 55 p. 100 passant de \$7,056,000 en 1955 à \$10,932,000.

PACIFIQUE

Les débarquements sur la côte du Pacifique ont atteint des proportions record en mars (valeur de \$1,152,000) à cause surtout de la prise extrêmement considérable de hareng pendant les huit premiers jours du mois avant la clôture de la saison.

La valeur accrue des débarquements de lingue, de peignes, de crevettes et d'huîtres a aussi contribué au chiffre record.

ATLANTIQUE

Sur le littoral est, la prise totale, qui se chiffrait par 40,210,000 livres (\$1,796,000), a été inférieure de 1 p. 100 en volume mais supérieure de 8 p. 100 en valeur aux 40,557,000 livres (\$1,664,000) de mars 1955.

Au cours des trois premiers mois de l'année, les débarquements sont passés de 106,710,000 livres un an plus tôt à 132,510,000 livres, et leur valeur totale a bondi à \$5,869,000 (\$5,005,000).

La plus forte augmentation semble avoir été celle de la pêche de l'aiglefin à Terre-Neuve dont le chiffre déclaré (\$869,000) est supérieur de 90 p. 100 à celui de 1955.

STOCKS

Au 31 mars, les stocks de poisson congelé au Canada s'élevaient à 30,268,000 livres, dont 27,856,000 de poisson frais et 2,412,000 de poisson fumé. Le total des approvisionnements était inférieur de 3,969,000 livres (12 p. 100) pour le poisson frais et de 747,000 livres (45 p. 100) pour le poisson fumé, à ceux du 29 février 1956. Au regard de la fin de mars 1955, les stocks actuels de poisson congelé étaient supérieurs de 6,373,000 livres (30 p. 100) et ceux de poisson fumé congelé, de 367,000 livres (18 p. 100).

EXPORTATIONS

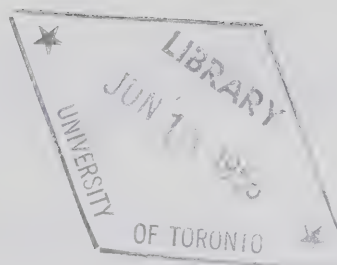

Au cours des deux premiers mois de l'année, le Canada a exporté du poisson et des produits du poisson pour une valeur de \$19,553,000, soit environ 3 p. 100 de plus que les \$19,043,000 de la période correspondante de l'année dernière.

FISHERIES OF CANADA - APRIL 1956

CANADA

In April landings in the sea-fisheries of Canada amounted to 60,569,000 lb. -- 27% lower than the 83,297,000 lb. taken in April, 1955 -- and were valued at \$3,725,000 -- 6% under the \$3,943,000 recorded in the same month of last year.

During the first four months of this year the value of the catch jumped 33% to \$14,677,000 from the comparable 1955 value of \$10,998,000.

PACIFIC

In April the landed value of fish caught on our Pacific Coast totalled \$507,000 compared to a value of \$407,000 placed on the fish landed during April, 1955.

This increase was due mainly to higher landings of salmon, this year's April catch being valued at \$164,000 as against \$85,000 in the same month of 1955.

ATLANTIC

On our Atlantic Coast the April catch -- 53,651,000 lb. worth \$3,218,000 -- was lower than the 79,388,000 lb. worth \$3,536,000 taken in April, 1955 by 32 and 9% respectively.

However, landings in the first four months of this year are slightly higher than the total for the same period of last year. The aggregate value of the Atlantic catch -- \$9,107,000 -- is approximately 7% above the 1955 figure of \$8,540,000.

STOCKS

On April 30th stocks of frozen fish in Canada amounted to 34,050,000 lb., of which 30,976,000 lb. were frozen fresh and 3,074,000 lb. frozen smoked. Total holdings were higher by 2,707,000 lb. (10%) fresh and by 648,000 lb. (27%) smoked than those of March 31st, 1956. Compared to the end of April, 1955 stocks, current holdings of frozen fresh fish were higher by 8,893,000 lb. (40%) and those of frozen smoked fish higher by 677,000 lb. (28%).

EXPORTS

In the first three months of this year exports of fish and fish products totalled \$29,618,000 -- little more than 1% higher than the \$29,211,00 worth sold abroad in the same period of 1955.

LA PECHE AU CANADA - AVRIL 1956

CANADA

En avril, les débarquements de poisson de mer se sont élevés à 60,569,000 livres, soit 27 p. 100 de moins que les 83,297,000 d'avril 1955, et ont été évalués à \$3,725,000, soit 6 p. 100 de moins que les \$3,943,000 de l'année dernière.

Au cours des quatre premiers mois de l'année, la valeur de la prise a augmenté de 33 p. 100, passant de \$10,998,000 en 1955 à \$14,677,000.

PACIFIQUE

En avril, la valeur des débarquements de poisson pris au large de la côte du Pacifique a atteint \$507,000, au regard des \$407,000 d'avril 1955.

Cette hausse a été surtout provoquée par les débarquements accrus de saumon; dont la prise d'avril a été évaluée à \$164,000, contre \$85,000 un an plus tôt.

ATLANTIQUE

Sur le littoral de l'Atlantique, la prise d'avril s'est chiffrée par 53,651,000 livres valant \$3,218,000, chiffres inférieurs de 32 et 9 p. 100 respectivement aux 79,388,000 livres valant \$3,536,000 d'avril 1955.

Les débarquements au cours des quatre premiers mois sont cependant légèrement supérieurs au total correspondant de l'année dernière. La valeur globale de la prise de l'Atlantique, \$9,107,000, dépasse d'environ 7 p. 100 \$8,540,000 de 1955.

STOCKS

Au 30 avril, les stocks de poisson congelé s'élevaient à 34,050,000 livres: 30,976,000 de frais et 3,074,000 de fumé, soit 2,707,000 (10 p. 100) et 648,000 (27 p. 100) de plus que le 31 mars 1956, et 8,893,000 (40 p. 100) et 677,000 (28 p. 100) de plus qu'à la fin d'avril.

EXPORTATIONS

Au cours des trois premiers mois de l'année, les exportations de poisson et de produits du poisson ont atteint \$29,618,000, soit près de 1 p. 100 de plus que les \$29,221,000 de 1955.

OTHER SHELLFISH - crab, mussel, winkle	- abalone, octopus, prawn, shrimp

FISHERIES OF CANADA - MAY 1956

CANADA

Landings in the sea-fisheries of Canada in May amounted to 144,328,000 lb. -- 12% below the 164,147,000 lb. taken in May, 1955 -- and were valued at \$9,441,000 -- a scant 2% higher than the \$9,219,000 recorded in the same month of last year.

During the first five months of this year the value of the catch rose 20% to \$24,107,000 from the comparable 1955 value of \$20,062,000.

PACIFIC

In May the landed value of the fish caught on our Pacific Coast totalled \$1,670,000 as against a value of \$1,475,000 placed on the fish landed during May, 1955.

Halibut landings were down considerably in May, but this season's operations did not get under way until the 20th, whereas in 1955 fishing began on the 12th of the month.

The value of the salmon catch -- \$415,000 -- was 46% higher than the May, 1955 value of \$285,000. This increase was due not only to higher landings at troll camps, but also to better unit prices.

ATLANTIC

During May fish to the value of \$7,771,000 were landed on our Atlantic Coast. In the same month of last year the catch was valued at \$7,744,000.

In the first five months of 1956 the value of the aggregate Atlantic Coast catch was \$16,867,000 -- 4% above the \$16,228,000 recorded for the same period of 1955. With the exception of rosefish and catfish, landings of groundfish are higher this year. The lobster catch, although slightly under last year's in volume, is slightly higher in value.

STOCKS

On May 31st stocks of frozen fish in Canada totalled 38,336,000 lb., of which 35,358,000 lb. were frozen fresh and 2,978,000 lb. frozen smoked. Total holdings were higher by 4,085,000 lb. (13%) fresh, but lower by 112,000 lb. (4%) frozen smoked than those of April 30th, 1956. Compared to the end of May, 1955 stocks, current holdings of fresh frozen fish were higher by 9,951,000 lb. (39%) and those of frozen smoked fish by 320,000 lb. (12%).

EXPORTS

Exports of Canadian fish and fish products in the first four months of 1956 amounted to \$38,435,000 -- 4% higher than the \$37,102,000 recorded in the comparable period of last year. Sales in all categories are up, except for canned (down 10%) and salt fish (down 8%).

LA PECHE AU CANADA - MAI 1956

CANADA

En mai, les débarquements de poisson de mer se sont élevés à 144,328,000 livres, soit 12 p. 100 de moins qu'en mai 1955 (164,147,000 livres). Leur valeur a atteint \$9,441,000, soit 2 p. 100 de plus qu'en mai 1955 (\$9,219,000).

Durant les cinq premiers mois de cette année, la valeur de la pêche a augmenté de 20 p. 100 par rapport à la valeur correspondante de 1955 (\$24,107,000 contre \$20,062,000).

PACIFIQUE

En mai, la valeur débarquée du poisson pêché au large de la côte du Pacifique a atteint \$1,670,000 contre \$1,475,000 en mai 1955. Les débarquements de flétan ont considérablement diminué en mai; cette année, la pêche n'a toutefois commencé que vers le 20, tandis qu'en 1955 elle avait commencé le 12 du mois.

Quant à la valeur du saumon pêché (\$415,000), elle a été de 46 p. 100 supérieure à celle de mai 1955. Cette augmentation n'a pas été seulement due à des débarquements accrus de la pêche à la ligne traînante mais aussi à des prix unitaires plus élevés.

ATLANTIQUE

Au cours du mois de mai, on a débarqué du poisson sur notre côte de l'Atlantique pour une valeur de \$7,771,000. Au cours du même mois de l'an dernier, la valeur de la pêche a atteint \$7,744,000.

Durant les cinq premiers mois de l'année 1956, la valeur totale de la pêche sur la côte de l'Atlantique a atteint \$16,867,000, soit 4 p. 100 de plus que la valeur atteinte au cours de la période correspondante de 1955 (\$16,228,000). Exception faite pour les chèvres et les silures, les débarquements de poissons de fond sont plus élevés cette année. Quant à la pêche des homards, si la quantité en a légèrement diminué par rapport à l'année dernière, sa valeur a légèrement augmenté.

STOCKS

Au 31 mai, les stocks de poisson congelé s'élevaient à 38,336,000 livres, dont 35,358,000 de frais et 2,978,000 de fumé. Les stocks totaux ont été de 13 p. 100 ou de 4,085,000 livres de plus que ceux du 30 avril, et pour ce qui est du frais; pour ce qui est du fumé, ils ont diminué de 112,000 livres, soit 4 p. 100. Si on les compare aux stocks de la fin de ~~mai~~ 1955, les stocks courants de poisson frais congelé, étaient de 9,951,000 livres (39 p. 100) supérieurs et ceux de poisson fumé congelé de 320,000 livres (12 p. 100).

EXPORTATIONS

Les exportations de poisson canadien et de produits du poisson ont atteint \$38,435,000, soit 4 p. 100 de plus que les \$37,102,000 atteints au cours de la période correspondante de l'an dernier. Dans toutes les catégories, les ventes sont en augmentation, sauf pour le poisson en boîte (diminution de 10 p. 100) et pour le poisson salé (diminution de 8 p. 100).

sturgeon, tomcod smelt, sturgeon

OTHER SHELLFISH - crab, mussel, winkle - abalone, octopus, prawn, shrimp

FISHERIES OF CANADA - JUNE 1956

CANADA

Landings in the sea fisheries of Canada for June were recorded at 219,666,000 lb. -- 20% above the 183,078,000 lb. taken in June 1955 -- and were valued at \$11,712,000 -- 25% higher than the \$9,378,000 shown for the comparative month of last year.

During the first six months of this year the value of the catch was recorded at \$35,820,000 -- a 22% increase over the \$29,443,000 shown for the corresponding period of last year.

ATLANTIC

The value of fish landed on our Atlantic Coast during June amounted to \$8,549,000 -- a 13% increase over the \$7,562,000 recorded for the same period of last year.

In the first six months of 1956 the value of the aggregate Atlantic Coast catch was \$25,417,000 -- 7% above the \$23,793,000 reported for the comparative period of last year.

PACIFIC

The landed value of the British Columbia June catch -- \$3,163,000 -- was 74% above the \$1,816,000 earned by the fishermen in June, 1955.

Halibut landings amounted to almost 8 million pounds, and were valued at \$1,670,000, whereas in the same month of last year they totalled approximately 6 million pounds and were valued at \$749,000.

The total value of all salmon landed was \$1,136,000 -- 46% higher than the \$777,000 realized in June of last year.

STOCKS

On June 30th stocks of frozen fish in Canada totalled 46,680,000 lb., and of this amount 44,058,000 lb. were frozen fresh and 2,622,000 lb. frozen smoked. Total holdings were higher by 8,875,000 lb. (25%) fresh, but lower by 358,000 lb. (12%) smoked than those on May 31st, 1956. Compared to the end of June, 1955 stocks, current holdings of fresh frozen fish were higher by 8,853,000 lb. (25%) and those of frozen smoked fish lower by 36,000 lb. (1%).

EXPORTS

Exports of fish and fish products during the first six months of this year amounted to \$60,031,000, only fractionally lower than the \$61,042,000 recorded in the comparable period of 1955. Sales of freshwater fish, of fresh and frozen fillets and blocks, of smoked and pickled fish, of meal and oils were up, but not enough to counteract the drop in exports of canned, salted and fresh sea fish.

LA PECHE AU CANADA - JUIN 1956

CANADA

En juin, les débarquements de poissons de mer se sont élevés à 219,666,000 livres soit 20 p. 100 de plus qu'en juin 1955 (183,078,000). Leur valeur a atteint \$11,-712,000, soit 25 p. 100 de plus que les \$9,378,000 de juin 1955.

Durant les cinq premiers mois de cette année, la valeur de la pêche a atteint \$35,820,000, soit 22 p. 100 de plus que les \$29,443,000 de la période correspondante de 1955 dernier.

ATLANTIQUE

Au cours du mois de juin, on a débarqué du poisson sur la côte atlantique pour une valeur de \$8,549,000, soit 13 p. 100 de plus qu'en juin 1955 (\$7,562,000).

Durant les six premiers mois de 1956, la valeur de la pêche sur la côte atlantique a été de \$25,417,000, soit une augmentation de 7 p. 100 sur les \$23,793,000 de la période correspondante de l'an dernier.

PACIFIQUE

Au cours du mois de juin, la valeur des débarquements de poisson en Colombie-Britannique a été de \$3,163,000, soit 74 p. 100 de plus que les \$1,816,000 qu'en juin 1955.

Les débarquements de flétan se sont élevés à presque 8 millions de livres, et leur valeur a été de \$1,670,000, alors qu'au cours de juin 1955 ils se sont élevés à environ 6 millions de livres (\$749,000).

La valeur totale de tout le saumon débarqué a atteint \$1,136,000, soit 46 p. 100 de plus qu'en juin 1955 (\$777,000).

STOCKS

Au 30 juin, les stocks de poisson congelé s'élevaient à 46,680,000 livres, dont 44,058,000 de frais et 2,622,000 de fumé. Les stocks totaux étaient supérieurs de 8,875,000 livres (25 p. 100) pour ce qui est du frais mais inférieurs de 358,000 livres (12 p. 100) pour ce qui est du fumé, par rapport à ceux au 31 mai 1956. Si on les compare aux stocks de la fin de juin 1955, les stocks courants de poisson frais congelé étaient de 8,853,000 livres (25 p. 100) supérieurs et ceux de poisson fumé congelé de 36,000 livres (1 p. 100) inférieurs.

EXPORTATIONS

Au cours des six premiers mois de cette année, les exportations de poisson et de produits du poisson ont atteint \$60,031,000, c.-à-d. qu'elles ont été légèrement inférieures aux \$61,042,000 de la période correspondante de 1955. Les ventes de poissons d'eau douce, de filets et blocs frais et congelés, de poisson fumé et saumuré, de farine et d'huile de poisson ont progressé, mais pas suffisamment pour compenser la chute des exportations de poisson de mer en boîte, salé et frais.

FISHERIES OF CANADA - JULY, 1956

CANADA

Landings in July in the sea fisheries of Canada amounted to 343,446,000 lb. -- 14% above the 300,936,000 lb. taken in July, 1955 -- and were valued at \$17,082,000 -- 34% higher than the \$12,784,000 shown for the same month of last year.

During the first seven months of 1956 the value of the catch was reported to be \$53,134,000 -- a 26% increase over the \$42,228,000 shown for the same period of 1955.

ATLANTIC

The value of the fish landed on our Atlantic Coast during July was set at \$8,189,000 -- an increase of 6% over the \$7,714,000 recorded in July, 1955.

In the first seven months of 1956 the value of the aggregate Atlantic Coast catch was \$33,838,000 -- 7% higher than the total of \$31,508,000 reported in the same period of 1955.

PACIFIC

In July our West Coast fisheries yielded fish to the value of \$8,893,000, approximately 75% above last year's comparable monthly total of \$5,070,000. This huge increase can be attributed almost wholly to heavier salmon landings coupled with generally stronger unit prices prevailing in most of the major species.

Herring landings during July climbed from an almost negligible figure last year to almost 4,000 tons.

There was a marked decline in the black cod catch, only 70,000 lb. were brought in compared to 492,000 lb. a year ago.

STOCKS

On July 31st stocks of frozen fish in Canada totalled 58,652,000 lb., and consisted of 56,142,000 lb. frozen fresh and 2,510,000 frozen smoked. Total holdings were higher by 8,824,000 lb. (19%) frozen fresh, but lower by 245,000 lb. smoked (9%) than those of June 30th, 1956. Compared to the end of July, 1955 stocks, current holdings of fresh frozen fish were higher by 11,118,000 lb. (25%) and those of frozen smoked fish lower by 259,000 lb. (9%).

EXPORTS

Exports of Canadian fish and fish products during the first seven months of this year amounted to \$72,440,000 -- 5% higher than the \$69,065,000 reported in the same period of 1955. Sales in all categories, except those of canned fish and salted fish, are higher this year.

LA PECHE AU CANADA - JUILLET, 1956

CANADA

En juillet, les débarquements de poissons de mer se sont élevés à 343,-446,000 livres, soit 14 p. 100 de plus qu'en juillet 1955 (300,936,000). Leur valeur a atteint \$17,082,000, soit 34 p. 100 de plus que les \$12,784,000 de juillet 1955.

Durant les sept premiers mois de cette année, la valeur de la prise a atteint \$53,134,000, soit 26 p. 100 de plus que les \$42,228,000 de la période correspondante de 1955.

ATLANTIQUE

Au cours du mois de juillet, on a débarqué du poisson sur la côte atlantique pour une valeur de \$8,189,000, soit 6 p. 100 de plus qu'en juillet 1955 (\$7,562,000).

Durant les sept premiers mois de 1956, la valeur de la prise sur la côte de l'atlantique a été de \$33,838,000, soit une augmentation de 7 p. 100 sur les \$31,508,000 de la période correspondante de 1955.

PACIFIQUE

En juillet, les pêcheries de la côte de l'Ouest ont donné une valeur de \$8,893,000, environ 75 p. 100 de plus qu'en juillet 1955 (\$5,070,000). Cette remarquable augmentation est presque entièrement due à de plus gros débarquements de saumon combinés avec des prix généralement plus élevés pour la plupart des espèces de poissons.

Les débarquements de hareng pendant le mois ont passé d'un chiffre négligeable en juillet 1955 à près de 4,000 tonnes cette année.

Les prises de morue noire ont accusé une diminution importante, les débarquements se limitant à 70,000 livres contre 492,000 livres un an plus tôt.

STOCKS

Au 31 juillet, les stocks de poisson congelé s'élevaient à 58,652,000 livres, dont 56,142,000 livres de frais et 2,510,000 de fumé. Les stocks totaux étaient supérieurs de 8,824,000 livres (19 p. 100) pour ce qui est du frais mais inférieurs de 245,000 livres (9 p. 100) pour ce qui est du fumé par rapport à ceux du 30 juin 1956. Si on les compare aux stocks de la fin de juillet 1955, les stocks courants de poisson frais congelé étaient de 11,118,000 livres (25 p. 100) supérieurs et ceux de poisson fumé congelé de 259,000 livres (9 p. 100) inférieurs.

EXPORTATIONS

Au cours des sept premiers mois de cette année, les exportations de poisson et de produits du poisson ont atteint \$72,440,000, soit 5 p. 100 de plus que les \$69,065,000 de la période correspondante de 1955. Cette année, les ventes ont été plus élevées pour toutes les espèces de poissons, sauf le poisson en boîte et le poisson salé.

FISHERIES OF CANADA - AUGUST, 1956

CANADA

August landings in the sea fisheries of Canada were on approximately the same level as in August of last year -- 267,772,000 lb. as against 261,921,000 lb., with a current value of \$14,066,000 compared to \$14,257,000 in 1955.

During the first eight months of this year the value of the catch was reported to be \$67,450,000 -- 19% higher than the \$56,488,000 recorded in the same period of last year.

ATLANTIC

On our Atlantic Coast the value of the August catch, \$7,044,000, was 9% above the August, 1955 value of \$6,463,000.

During the first eight months of this year the aggregate Atlantic Coast catch was valued at \$41,132,000 -- less than 1% higher than the comparable 1955 value of \$37,972,000. The most notable increase appears in the lobster fishery, wherein the total value to date is \$13,896,000 as against \$12,836,000 in the same period of last year.

PACIFIC

In August the fisheries of British Columbia reported a catch valued primarily at \$7,022,000 -- \$772,000 or approximately 10% below the \$7,794,000 recorded in the same month of 1955.

The most significant decrease occurred in the salmon fishery, where the landed value dropped 30% from the August, 1955 figure of \$7,128,000 to \$5,891,000.

Halibut landings totalled 2.6 million pounds compared to a total of 3.1 million pounds last August. However, higher unit prices brought a 25% increase in returns to the fisherman, who received \$605,000 for his efforts compared to \$478,000 in the same month of last year.

STOCKS

On August 31st stocks of frozen fish in Canada totalled 67,192,000 lb., of which 64,723,000 lb. were frozen fresh and 2,469,000 lb. frozen smoked. Total holdings were higher by 6,880,000 lb. (12%) fresh, but lower by 373,000 lb. (13%) smoked than those at July 31st, 1956. Compared to the end of July 1955 stocks, current holdings of fresh frozen fish were higher by 12,353,000 lb. (24%), while those of frozen smoked fish were lower by 58,000 lb. (2%).

EXPORTS

Exports of Canadian fish and fish products during the first eight months of 1956 totalled \$84,749,000 -- 7% higher than the \$79,317,000 reported in the same period of 1955. Sales of canned fish and salted fish are both approximately 15% below last year's level.

LA PECHE AU CANADA - AOÛT 1956

CANADA

En août, les débarquements de poisson de mer ont été approximativement les mêmes qu'en août de l'année précédente, soit 267,772,000 livres (261,921,000). Leur valeur courante s'est élevée à \$14,066,000 (\$14,257,000 en 1955).

Au cours des huit premiers mois de cette année, la valeur de la prise s'est élevée à \$67,450,000, soit 19 p. 100 de plus que pour la même période de l'année précédente (\$56,488,000).

ATLANTIQUE

Sur la côte de l'Atlantique, la valeur de la prise du mois d'août, \$7,044,000, a surpassé de 9 p. 100 celle d'août 1955 (\$6,463,000).

Durant les huit premiers mois de 1956, la valeur de la prise sur la côte de l'Atlantique a été de \$41,132,000, moins de 1 p. 100 supérieure à celle de la période correspondante de 1955 (\$37,972,000). L'augmentation la plus remarquable a eu lieu dans la pêche du homard dont la valeur totale à date s'élève à \$13,896,000 contre \$12,836,000 en 1955.

PACIFIQUE

En août, les pêcheries de la Colombie-Britannique ont donné une valeur de \$7,022,000, soit \$772,000 ou 10 p. 100 de moins que celle d'août 1955 (\$7,794,000).

La diminution la plus importante a été celle de la pêche de saumon dont la valeur des débarquements a diminué de 30 p. 100 au regard de celle d'août 1955, soit \$5,891,000 contre \$7,128,000.

Les débarquements de flétan ont atteint 2.600,000 livres contre un total de 3.100,000 en août 1955. Cependant, des prix unitaires plus élevés ont donné une augmentation de 25 p. 100 de revenu aux pêcheurs, qui ont reçu \$605,000 contre \$478,000 en août 1955.

STOCKS

Au 31 août, les stocks de poisson congelé s'élevaient à 67,192,000 livres, dont 64,723,000 livres de frais et 2,469,000 de fumé. Les stocks totaux étaient supérieurs de 6,880,000 livres (12 p. 100) pour ce qui est du frais, mais inférieurs de 373,000 livres (13 p. 100) pour ce qui du fumé par rapport à ceux du 31 juillet 1956. Comparés à ceux de la fin de juillet 1955, les stocks courants de poisson frais congelé étaient de 12,353,000 livres (24 p. 100) supérieurs et ceux de poisson fumé congelé de 58,000 livres (2 p. 100) inférieurs.

EXPORTATIONS

Au cours des huit premiers mois de 1956, les exportations de poisson et de produits du poisson ont atteint \$84,749,000, soit 7 p. 100 de plus que les \$79,317,000 de la période correspondante de 1955. Les ventes de poisson en boîte et de poisson salé sont toutes les deux d'environ 15 p. 100 inférieures à celles de l'an dernier.

OTHER SHELLFISH - crab, mussel, winkle	- abalone, octopus, prawn, shrimp

FISHERIES OF CANADA - SEPTEMBER 1956

CANADA

Landings in the sea-fisheries of Canada in September -- 178,976,000 lb. worth \$8,681,000 to the fisherman -- were 2% greater in volume, but 3% lower in value than the 175,365,000 lb. worth \$8,951,000 taken in September, 1955.

During the first nine months of this year the value of the catch was reported to be \$76,379,000 -- 17% more than the \$65,442,000 recorded in the same period of last year.

ATLANTIC

On our Atlantic Coast the value of the September catch -- \$4,371,000 -- was approximately 2% below the September, 1955 value of \$4,483,000.

During the January-September period of this year the aggregate Atlantic Coast catch was valued at \$45,473,000 -- 7% higher than the comparable 1955 value of \$42,454,000. In the lobster fishery the total value of the catch to date is given as \$14,687,000 as against \$13,685,000 in the same period of last year.

PACIFIC

In September the fisheries of British Columbia reported a catch with a primary value of \$4,310,000, about 3% lower than the \$4,468,000 recorded in the same month of 1955.

The total landed value for salmon -- \$3,104,000 -- was approximately 30% below last year's total of \$4,286,000. Very strong unit prices prevailed in this fishery.

For the first time in many years the International Halibut Commission permitted a 'second season'. As a result almost three million pounds of this species were landed during September. To date the cumulative catch stands at 22,344,000 lb. with a value of \$4,856,000.

STOCKS

On September 30th stocks of frozen fish in Canada totalled 74,448,000 lb. of which 72,273,000 lb. were frozen fresh and 2,175,000 lb. frozen smoked. Total holdings were higher by 3,526,000 lb. (5%) fresh, but lower by 368,000 lb. (14%) smoked than those at August 31st, 1956. Compared to the end of September, 1955 stocks, current holdings of fresh frozen fish were higher by 20,227,000 lb. (39%), while those of frozen smoked fish were lower by 445,000 lb. (17%)

EXPORTS

Exports of Canadian fish and fish products during the first nine months of 1956 totalled \$97,787,000 -- approximately 5% higher than the \$93,529,000 reported in the same period of 1955. Sales of fish meal have increased by about 50% this year.

LA PECHE AU CANADA - SEPTEMBRE 1956

CANADA

En septembre, les débarquements de poisson de mer, 178,976,000 livres d'une valeur de \$8,681,000 pour le pêcheur, - ont été de 2 p. 100 plus élevés en volume, mais de 3 p. 100 inférieurs en valeur au regard des 175,365,000 livres (\$8,951,000) de septembre 1955.

Au cours des neuf premiers mois de l'année, la valeur de la prise s'est élevée à \$76,379,000, soit 17 p. 100 de plus que les \$65,442,000 de la même période en 1955.

ATLANTIQUE

Sur la côte de l'Atlantique, la valeur de la prise de septembre, \$4,371,000, a été approximativement de 2 p. 100 inférieure à celle de septembre 1955 (\$4,483,000).

Au cours de la période janvier-septembre de 1956, la prise sur la côte de l'Atlantique s'est élevée à \$45,473,000 soit 7 p. 100 de plus qu'en 1955 (\$42,454,000). Pour la pêche du homard, la valeur de la prise à date s'élève à \$14,687,000 contre \$13,685,000 pour la même période de l'an dernier.

PACIFIQUE

En septembre, la pêche en la Colombie-Britannique a donné, en valeur primaire, \$4,310,000, environ 3 p. 100 de moins que les \$4,468,000 de septembre 1955.

La valeur totale du saumon débarqué, \$3,104,000, a été approximativement 30 p. 100 inférieure à celle de septembre 1955 (\$4,468,000).

Pour la première fois depuis plusieurs années la Commission internationale du flétan a permis une "deuxième saison". Par suite, trois millions de livres de ce poisson ont été débarquées en septembre. Jusqu'ici, la prise cumulative s'élève à 22,344,000 livres (\$4,856,000).

STOCKS

Au 30 septembre, les stocks de poisson congelé au Canada s'élevaient à 74,448,000 livres dont 72,273,000 livres de frais et 2,175,000 de fumé. Les stocks totaux étaient supérieurs de 3,526,000 livres (5 p. 100) pour ce qui est du frais, mais inférieurs de 368,000 livres (14 p. 100) pour ce qui est du fumé par rapport à ceux du 31 août 1956. Comparés à ceux de la fin de septembre 1955, les stocks courants de poisson frais congelé étaient de 20,227,000 livres (39 p. 100) supérieurs et ceux de poisson fumé congelé de 445,000 livres (17 p. 100) inférieurs.

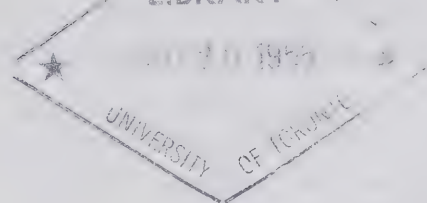

EXPORTATIONS

Au cours des neuf premiers mois de 1956, les exportations canadiennes de poisson et de produits du poisson ont atteint \$97,787,000, soit approximativement 5 p. 100 de plus que les \$93,529,000 de la période correspondante de 1955. Les ventes de repas de poisson ont augmenté d'environ 50 p. 100 cette année.

OTHER SHELLFISH - crab, mussel, winkle	- abalone, octopus, prawn, shrimp

FISHERIES OF CANADA - OCTOBER 1956

CANADA

Landings in the sea-fisheries of Canada in October -- 110,449,000 lb. worth \$5,256,000 to the fisherman -- were 15% higher in volume and 13% higher in value than the 95,930,000 lb. worth \$4,186,000 taken in October, 1955.

During the first ten months of this year the value of the catch was reported to be \$81,655,000 -- 17% more than the \$69,629,000 recorded in the same period of last year.

ATLANTIC

On the Atlantic Coast the value of the October catch, \$2,952,000, was 17% above the October, 1955 value of \$2,515,000.

For the January-October period of this year the aggregate Atlantic Coast catch was valued at \$48,455,000 -- 8% higher than the comparable 1955 value of \$44,970,000. Returns from the lobster fishery to date show a total value of \$14,844,000 as against \$13,846,000 in the same period of last year. The value of the cod catch in 1956 has risen to \$14,486,000 from \$13,675,000, the greater part of this increase having been recorded in Quebec.

PACIFIC

The landed value of British Columbia's fisheries in October amounted to \$2,304,000, and was 38% higher than last October's total of \$1,671,000. This rise was largely due to the increased value of salmon landings, particularly those of chums and coho. Unit prices for salmon in general continued very strong.

STOCKS

On October 31st stocks of frozen fish in Canada totalled 79,070,000 lb., of which 77,014,000 lb. were frozen fresh and 2,056,000 lb. frozen smoked. Total holdings were lower by 1,281,000 lb. (2%) fresh and also lower by 322,000 lb. (13%) smoked than those at September 30th, 1956. Compared to end of October, 1955 stocks, current holdings of fresh frozen fish were higher by 25,698,000 lb. (50%) while those of frozen smoked fish were lower by 499,000 lb. (20%).

EXPORTS

Exports of fish and fish products from Canada during the first ten months of this year totalled \$114,313,000, approximately 8% higher than the \$106,079,000 reported in the same period of 1955. Sales of dried and salted cod are lower, but those of all other groups higher this year.

LA PECHE AU CANADA - OCTOBRE 1956

CANADA

En octobre, les débarquements de poisson de mer au Canada, - 110,449,000 livres d'une valeur de \$5,256,000 pour le pêcheur, - ont augmenté de 15 p. 100 en volume et de 13. p. 100 en valeur au regard des 95,930,000 livres (\$4,186,000) d'octobre 1955.

Au cours des dix premiers mois de l'année, la valeur de la prise s'est élevée à \$81,655,000, soit 17 p. 100 de moins que les \$69,629,000 de la même période en 1955.

ATLANTIQUE

Sur la côte de l'Atlantique, la valeur de la prise d'octobre (\$2,952,000 a été de 17 p. 100 supérieure à celle d'octobre 1955 (\$2,515,000).

Au cours de la période janvier-octobre de cette année, la prise cumulative sur la côte de l'Atlantique a atteint la valeur de \$48,455,000 soit 8 p. 100 de plus que durant la période correspondante de 1955 (\$44,970,000). Pour la pêche du homard, la valeur de la prise jusqu'ici atteint \$14,844,000, contre \$13,846,000 pour la même période de 1955. La valeur de la prise de morue en 1955 est montée de \$13,675,000 à \$14,486,000, le Québec enregistrant la majeure partie de cette augmentation.

PACIFIQUE

En octobre, la valeur des débarquements de poisson en Colombie-Britannique s'est chiffrée par \$2,304,000, soit 38 p. 100 de plus qu'en octobre 1955 (\$1,671,000). Cette augmentation est attribuable surtout à la valeur accrue des débarquements de saumon, particulièrement de la variété saumon-chien et coho. En général, le prix unitaire du saumon s'est maintenu très ferme.

STOCKS

Au 31 octobre, les stocks de poisson congelé au Canada s'élevaient à 79,070,000 livres, dont 77,014,000 livres de frais et 2,056,000 livres de fumé. Les stocks totaux étaient inférieurs de 1,281,000 livres (2 p. 100) pour ce qui est du frais, et de 322,000 livres (13 p. 100) pour ce qui est du fumé, par rapport à ceux du 30 septembre 1956. Comparés à ceux de la fin d'octobre 1955, les stocks courants de poisson frais congelé étaient supérieurs de 25,698,000 livres (50 p. 100) tandis que ceux de poisson fumé congelé étaient inférieurs de 499,000 livres (20 p. 100).

EXPORTATIONS

Au cours des dix premiers mois de 1956, les exportations canadiennes de poisson et de produits du poisson ont atteint \$114,313,000, soit approximativement 8 p. 100 de plus que les \$106,079,000 de la période correspondante de 1955. Les ventes de morue séchée et salée ont diminué, tandis que celles de tous les autres groupes ont augmenté cette année.

sturgeon, tomcod smelt, sturgeon

OTHER SHELLFISH - crab, mussel, winkle - abalone, octopus, prawn, shrimp

FISHERIES OF CANADA - NOVEMBER 1956

CANADA

Landings in the sea-fisheries of Canada in November -- 54,368,000 lb. worth \$2,069,000 -- were 57% lower in volume and 28% lower in value than the 126,379,000 lb. worth \$2,865,000 taken in November, 1955.

In the first eleven months of the year the value of the catch was reported to be \$84,099,000 -- 16% above the \$72,501,000 recorded in the same period of last year.

ATLANTIC

On the Atlantic Coast the value of the November catch -- \$1,842,000 -- was 11% above the value of \$1,653,000 placed upon the November, 1955 catch.

During the January-November period of 1956 the aggregate Atlantic Coast landings were valued at \$50,672,000 -- 9% higher than the comparable 1955 value of \$46,630,000. To date the lobster fishery shows a total of \$15,182,000 as against \$14,168,000 in the same eleven-month period of the previous year. The value of the cod catch rose 9% to \$15,232,000 from \$13,990,000 in 1955. The greater part of this substantial increase may be attributed to the Quebec fishery where the cod catch to the end of November was valued at \$1,731,000 compared to \$937,000 in the first eleven months of 1955.

PACIFIC

In British Columbia the total value of fish landings during November -- \$227,000 -- was one of the lowest on record. In the same month of 1955 the catch was valued at \$1,212,000.

Herring landings were greatly reduced, the main fleet being held in port pending the results of negotiations between the operators and fishermen on prices and other considerations.

STOCKS

On November 30th stocks of frozen fish in Canada totalled 74,633,000 lb., of which 71,550,000 lb. were frozen fresh and 3,083,000 lb. frozen smoked. Total holdings were lower by 6,909,000 lb. (9%) fresh, but higher by 962,000 lb. (45%) smoked than those of October 31st, 1956. Compared to the end of November, 1955 stocks, current holdings of fresh frozen fish were higher by 27,599,000 lb. (63%) while those of frozen smoked fish were higher by 787,000 lb. (35%).

EXPORTS

Exports of fish and fish products from Canada during the first eleven months of 1956 amounted to \$124,800,000 -- approximately 6% higher than the total of \$117,508,000 reported in the same period of 1955.

LA PECHE AU CANADA - NOVEMBRE 1956

CANADA

Les débarquements de poisson de mer au Canada en novembre - 54,368,000 livres d'une valeur de \$2,069,000 - ont diminué de 57 p. 100 en volume et de 28 p. 100 en valeur au regard des 126,379,000 livres (\$2,865,000) en novembre 1955.

Au cours des onze premiers mois de l'année, la valeur de la prise s'est élevée à \$84,099,000, soit 16 p. 100 de plus que les \$72,501,000 de la même période l'an dernier.

ATLANTIQUE

Sur la côte de l'Atlantique, la valeur de la prise de novembre (\$1,842,000) a été de 11 p. 100 plus élevée que celle de novembre 1955 (\$1,653,000).

Au cours de la période janvier-novembre 1956, les débarquements cumulatifs de la côte de l'Atlantique ont atteint la valeur de \$50,672,000, soit 9 p. 100 de plus que durant la période correspondante de 1955 (\$46,630,000). Jusqu'ici, la pêche du homard a atteint la valeur de \$15,182,000 contre \$14,168,000 pendant la même période de l'année précédente. La valeur de la prise de morue a augmenté de 9 p. 100 à \$15,232,000 contre \$13,990,000 en 1955. La majeure partie de cette augmentation marquée peut être attribuée aux pêcheries du Québec, où la prise de morue, à la fin de novembre, a été évaluée à \$1,731,000 contre \$937,000 pendant la même période de 1955.

PACIFIQUE

En Colombie-Britannique, la valeur totale des débarquements de poisson en novembre (\$227,000) a été l'une des plus faibles jamais enregistrées. En novembre 1955, elle avait été de \$1,212,000.

Les débarquements de hareng ont fort diminué, le gros de la flotte ayant été retenu au port en attendant les résultats des négociations entre les exploitants et les pêcheurs au sujet des prix et d'autres questions.

STOCKS

Au 30 novembre, les stocks de poisson congelé au Canada ont atteint 74,633,000 livres dont 71,550,000 livres de frais et 3,083,000 livres de fumé. Les stocks totaux étaient inférieurs de 6,909,000 livres (9 p. 100) pour ce qui est du frais, mais supérieurs de 962,000 livres (45 p. 100) pour ce qui est du fumé, par rapport à ceux du 31 octobre 1956. Comparés à ceux de la fin de novembre 1955, les stocks courants de poisson frais congelé étaient supérieurs de 27,599,000 livres (63 p. 100) et ceux de poisson fumé congelé, de 787,000 livres (35 p. 100).

EXPORTATIONS

Au cours des onze premiers mois de 1956, les exportations de poisson et de produits du poisson ont atteint \$124,800,000, soit approximativement 6 p. 100 de plus que les \$117,508,000 de la période correspondante de 1955.

EXPLANATION

ATLANTIC	PACIFIC
OTHER FLATFISH - flounders, greysole, skate, turbot, witch, yellowtail	- flounders, skate
OTHER ESTUARIAL - eel, shad, sea-bass or -perch, sturgeon, tomcod	- eulachon, sea-bass or -perch, smelt, sturgeon
OTHER SHELLFISH - crab, mussel, winkle	- abalone, octopus, prawn, shrimp

FISHERIES OF CANADA - DECEMBER 1956

CANADA

Landings in the sea-fisheries of Canada in December -- 162,110,000 lb. worth \$5,593,000 - were 5% greater and 8% more valuable to the fisherman than the 154,307,000 lb. worth \$5,185,000 taken in December, 1955.

The 1956 catch is reported to be 2,023,237,000 lb. worth \$89,679,000, but it must be noted that these figures are preliminary only and are subject to revision. In 1955 the comparable figures were 1,780,034,000 lb. and \$77,688,000. Landings would, therefore, seem to be approximately 14% higher in volume and 15% higher in value in 1956.

ATLANTIC

The value of the Atlantic Coast catch in December -- \$3,843,000 -- is 15% above the value of \$3,348,000 placed upon the December, 1955 catch.

During 1956 the aggregate Atlantic Coast landings were valued at \$54,502,000 -- 9% higher than the comparable 1955 value of \$49,980,000. A total of \$17,764,000 was reported for the lobster fishery, an increase of 7% over the previous year's value of \$16,596,000. The value of the cod catch rose by 10% to \$15,622,000 from \$14,206,000. All the Eastern Provinces shared in this increase, but none more so than Quebec, where cod landings and landed values were 70,319,000 lb. and \$1,731,000 as against 41,324,000 lb. and \$938,000 in 1955.

PACIFIC

In British Columbia the total value of fish landings during December -- \$1,750,000 -- was 5% below the December, 1955 value of \$1,837,000.

Preliminary figures for 1956 indicate that the aggregate value of the Pacific Coast catch rose some 27% to \$35,177,000 from \$27,708,000. Salmon landings were valued at \$20,805,000, up by 12% from \$18,481,000. In the herring fishery the total landed value of \$7,057,000 was almost 70% higher than the comparable 1955 value of \$4,187,000.

STOCKS

On December 31st stocks of frozen fish in Canada amounted to 69,106,000 lb., of which 67,072,000 lb. were frozen fresh and 2,034,000 lb. Freezings during December totalled 8,677,000 lb. and of this total 8,086,000 lb. were frozen from the fresh state, and 591,000 lb. from the smoked.

EXPORTS

Exports of fish and fish products from Canada during 1956 established a new record of \$133,634,000. In the previous year the value of fish exports was \$128,816,000, so that in 1956 an increase of about 4% was registered. Decreases in foreign sales of canned salmon, salt cod and pickled fish were more than offset by increased exports of all other categories. Worthy of note is the fact that the value of exports of fish meal -- \$7,810,000 -- was approximately 30% higher than the 1955 value of \$5,972,000.

LA PECHE AU CANADA - DECEMBRE 1956

CANADA

Les débarquements de poisson de mer au Canada en décembre - 162,110,000 livres d'une valeur de \$5,593,000 - ont augmenté de 5 p. 100 en volume et de 8 p. 100 en valeur pour le pêcheur au regard de 154,307,000 livres (\$5,185,000) en décembre 1955.

La prise de 1956 s'est élevée à 2,023,237,000 livres d'une valeur de \$89,-679,000, mais il faut tenir compte de ce que ces chiffres ne sont que provisoires et sont sujets à révision. En 1955, les chiffres comparatifs ont été 1,780,034,000 livres et \$77,688,000. Ainsi, les débarquements apparaîtraient être approximativement 14 p. 100 plus élevés en volume et 15 p. 100 en valeur en 1956.

ATLANTIQUE

Sur la côte de l'Atlantique, la valeur de la prise en décembre (\$3,843,000) a été de 15 p. 100 plus élevée que celle de décembre 1955 (\$3,348,000).

En 1956, l'ensemble des débarquements de la côte de l'Atlantique a été évalué à \$54,502,000, soit 9 p. 100 de plus que la valeur des débarquements de 1955 (\$49,980,000). Un total de \$17,764,000 a été rapporté pour la pêche de homard, une augmentation de 7 p. 100 sur la valeur de la pêche de l'année précédente (\$16,596,000). La valeur de la prise de morue a augmenté de 10 p. 100 à \$15,622,000 contre \$14,206,000. Toutes les provinces de l'Est ont eu une part de cette augmentation, mais pas autant que le Québec où les débarquements de morue se sont élevés à 70,319,000 livres d'une valeur de \$1,731,000 contre 41,324,000 livres et \$938,000 en 1955.

PACIFIQUE

En Colombie-Britannique, la valeur totale des débarquements de poisson en décembre (\$1,750,000) a été de 5 p. 100 inférieure à celle de décembre 1955 (\$1,837,000).

Les chiffres provisoires de 1956 indiquent que l'ensemble de la valeur de la prise de la côte du Pacifique a augmenté de 27 p. 100 à \$35,177,000 contre \$27,708,000. Les débarquements de saumon ont été évalués à \$20,805,000, soit une augmentation de 12 p. 100 sur les \$18,481,000 de 1955. Pour la pêche de hareng, les débarquements se sont élevés à une valeur totale de \$7,057,000, soit presque 70 p. 100 de plus que la valeur comparative de 1955 (\$4,187,000).

STOCKS

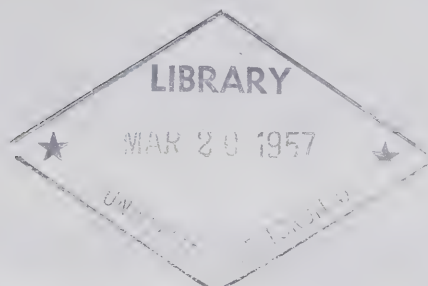

Au 31 décembre, les stocks de poisson congelé au Canada ont atteint 69,106,000 livres dont 67,072,000 livres de frais et 2,034,000 livres de fumé. La congélation au cours de décembre s'est élevée à 8,677,000 livres dont 8,086,000 livres de frais et 591,000 livres de fumé.

EXPORTATIONS

En 1956, les exportations de poisson et de produits du poisson ont atteint un nouveau sommet, soit \$133,634,000. L'année précédente la valeur des exportations de poisson s'était élevée à \$128,816,000; il s'ensuit que l'augmentation de 1956 a été d'environ 4 p. 100. Les diminutions des ventes à l'étranger de saumon en conserve, de morue salée et de poisson en saumure furent plus que contre-balancées par les augmentations des exportations des autres espèces. Un fait digne de remarque, c'est que la valeur des exportations de repas au poisson, \$7,810,000 a surpassé d'approximativement 30 p. 100 la valeur (\$5,972,000) de 1955.

EXPLANATION

ATLANTIC	PACIFIC
OTHER FLATFISH - flounders, greysole, skate, turbot, witch, yellowtail	- flounders, skate
OTHER ESTUARIAL - eel, shad, sea-bass or -perch, sturgeon, tomcod	- eulachon, sea-bass or -perch, smelt, sturgeon
OTHER SHELLFISH - crab, mussel, winkle	- abalone, octopus, prawn, shrimp

FISHERIES OF CANADA - JANUARY, 1957

CANADA

Landings in the sea-fisheries of Canada in January -- 103,296,000 lb. worth \$2,536,000 -- were 25% smaller and 28% lower in value than the 138,454,000 lb. worth \$3,531,000 reported in January, 1956.

ATLANTIC

The value of the Atlantic Coast catch in January -- \$1,273,000 -- was 39% below the value of \$2,080,000 placed on the January, 1956 catch.

Landings in all the major fisheries were lower this year, both in volume and value.

PACIFIC

On our Pacific Coast the total value of fish landings during January was \$1,263,000 -- 13% below the January, 1956 figure of \$1,451,000.

The herring catch amounted to approximately 76.4 million pounds compared to a total of 91.5 million pounds reported in January, 1956. The fishing effort during the month was hampered considerably by cold weather.

STOCKS

On January 31st stocks of frozen fish in Canada totalled 59,614,000 lb., of which 57,875,000 lb. were frozen fresh and 1,739,000 lb. frozen smoked. Total holdings were lower by 9,971,000 lb. (15%) fresh, and by 349,000 lb. (17%) smoked than those of December 31st, 1956. Compared to the end of January, 1956 stocks, current holdings of fresh frozen fish were higher by 17,961,000 lb. (45%) while those of frozen smoked fish were at approximately the same level.

EXPORTS

Exports of fish and fish products from Canada continue the record-breaking pace established in 1956. During January the total value of exports reached \$9,684,000 -- 2% higher than the \$9,540,000 reported in the same month of last year.

LA PECHE AU CANADA - JANVIER 1957

CANADA

Les débarquements de poisson de mer au Canada en janvier, -103,296,000 livres d'une valeur de \$2,536,000, - ont diminué de 25 p. 100 en volume et de 28 p. 100 en valeur au regard des 138,454,000 livres (\$3,531,000) en janvier 1956.

ATLANTIQUE

Sur la côte de l'Atlantique, la valeur de la prise en janvier (\$1,273,000) a été de 39 p. 100 inférieure à celle de janvier 1956 (\$2,080,000).

Les débarquements de toutes les pêches importantes ont été moindres cette année, en volume et en valeur.

PACIFIQUE

Sur la côte du Pacifique, la valeur totale des débarquements de poisson en janvier a été de \$1,263,000, soit 13 p. 100 inférieure à celle de janvier 1956 (\$1,451,000).

La prise de hareng s'est élevée approximativement à 76.400,000 livres au regard d'un total de 91.500,000 en janvier 1956. La pêche au cours du mois a été considérablement gênée par le temps froid.

STOCKS

Au 31 janvier, les stocks de poisson congelé au Canada ont atteint 59,614,000 livres dont 57,875,000 livres de frais et 1,739,000 livres de fumé. Les stocks ont été inférieurs soit 9,971,000 livres (15 p. 100) de frais et 349,000 livres (17 p. 100) de fumé à ceux du 31 décembre 1956. En comparaison de ceux de la fin de janvier 1956, les stocks courants de poisson frais congelé ont augmenté de 17,961,000 livres (45 p. 100), alors que ceux de poisson fumé congelé sont demeurés approximativement au même niveau.

EXPORTATIONS

Les exportations de poisson et de produits de poisson ont continué leur tendance aux records établis en 1956. Au cours de janvier, la valeur totale des exportations a atteint \$9,684,000, soit 2 p. 100 de plus que les \$9,540,000 du même mois l'an dernier.

FISHERIES OF CANADA - FEBRUARY 1957

CANADA

Landings in the sea-fisheries of Canada in February were valued at \$2,391,000 -- 47% below the value of \$4,525,000 placed upon the February, 1956 catch.

ATLANTIC

The value of the Atlantic Coast catch in February -- \$1,281,000 -- was 37% lower than the \$2,043,000 reported in February of last year.

The haddock fishery, both in Newfoundland and Nova Scotia, has shown a marked decline so far this year.

The value of the lobster catch in February was approximately 46% lower than in the same month of 1956, and this loss would appear to be due in the main to a lowering of unit prices.

PACIFIC

In February the landed value of the British Columbia fisheries totalled \$1,110,000, less than half of the \$2,482,000 reported in the same month of last year.

STOCKS

Stocks of frozen fish in Canada on February 28th amounted to 57,725,000 lb. -- 21,023,000 lb. more than at the same date last year. The increase was most significant in holdings of Pacific salmon and halibut.

EXPORTS

Exports of fish and fish products slumped noticeably during February, so much so that the value of shipments to foreign markets during the first two months of this year dropped 14% to \$16,788,000 from the \$19,553,000 recorded in the same period of last year. Sales of lobsters to the U.S. held up well, but exports of all other major species and products were well below last year's level.

LA PECHE AU CANADA - FEVRIER 1957

CANADA

Les débarquements de poisson de mer au Canada en février ont été évalués à \$2,391,000, soit 47 p. 100 de moins que la valeur (\$4,525,000) de la prise de février 1956.

ATLANTIQUE

La valeur de la prise de la côte de l'Atlantique en février, \$1,281,000, a été de 37 p. 100 inférieure à celle (\$2,043,000) de février l'année précédente.

La prise d'aiglefin, tant à Terre-Neuve et qu'en Nouvelle-Ecosse a diminué sensiblement jusqu'ici cette année.

La valeur de la prise de homard en février a été approximativement 46 p. 100 inférieure à celle du même mois en 1956, et cette diminution paraît provenir dans l'ensemble d'une baisse des prix unitaires.

STOCKS

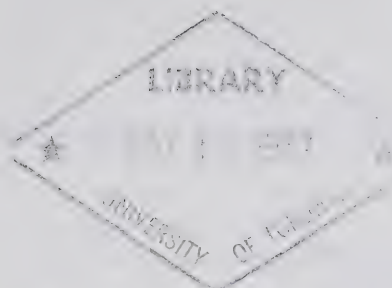

Les stocks de poisson congelé au Canada le 28 février se sont élevés à 57,725,000 livres, soit 21,023,000 livres de plus qu'à la même date l'an dernier. L'augmentation a été surtout significative pour les stocks de saumon et de flétan du Pacifique.

EXPORTATIONS

Les exportations de poisson et de produits du poisson ont diminué d'une manière remarquable en février de telle sorte que la valeur des expéditions au marchés étrangers au cours des deux premiers mois de cette année a diminué de 14 p. 100 à \$16,788,000 contre \$19,553,000 au cours de la même période l'année précédente. Les ventes de homard aux Etats-Unis se sont bien maintenues, mais les exportations de toutes les autres principales espèces et des principaux produits ont été bien inférieures à celles de l'an dernier.

OTHER FLATFISH - flounders, greysole, skate, turbot, witch, yellowtail	- flounders, skate
OTHER ESTUARIAL - eel, shad, sea-bass or -perch, sturgeon, tomcod	- eulachon, sea-bass or -perch, smelt, sturgeon
OTHER SHELLFISH - crab, mussel, winkle	- abalone, octopus, prawn, shrimp

FISHERIES OF CANADA - MARCH, 1957

The yield of the sea fisheries was satisfactory on the East Coast in March but the herring fishery failed to achieve last year's level in British Columbia. This brings the volume of landings for the sea fisheries 20 per cent below those of last year for the same month, while the value is down by 8 per cent. Landings in the first quarter declined from 460 million lb. and \$11.1 million in 1956 to 290 million lb. and \$7.7 million in the current year. The mediocre results of the herring fishery on the West Coast as well as of the cod and haddock fisheries on the East Coast were the major factors contributing to the change.

ATLANTIC COAST

The yield of the fisheries on the Atlantic Coast, at 43.7 million lb. and almost \$2.0 million, was slightly higher in March this year than last, due mainly to increased landings of flatfishes - soles or flounders - and of lobsters. However, the totals for the first quarter, at 100.8 million lb. and \$4.5 million were respectively 24.2 and 25.0 per cent lower than in 1956. This was largely the result of a low catch of cod and haddock in the first two months and of lower prices for lobsters. A change in the method of collection of fisheries statistics in the Maritimes in 1957 may somewhat contribute to the recorded changes.

BRITISH COLUMBIA

The catch of fish in British Columbia declined by 35 per cent, from 67.9 million lb. last year to 44.2 million lb. in March 1957, with a corresponding decline in value landed of 26.3 per cent. The cumulative figures for the first quarter follow a similar pattern. This was due to a much lower yield of the winter herring fishery this year than last. It is noteworthy that this fishery reached an exceptionally high level in the winter 1955-56.

INVENTORIES OF FISH AND EXPORTS

The total reported stocks of frozen fish reached 47.9 million lb. at the end of March and this was 44.2 per cent more than last year at the same date. The stocks of edible fisheries products (i.e. excluding bait and animal foods) at 29.2 million lb., were 42 per cent more than a year ago, the Pacific salmon and halibut mainly contributing to the increase. The inventories of fresh-frozen groundfish fillets, at 8.4 million lb., were virtually unchanged from the past year level.

The exports of fish and fishery products in the first quarter declined by 13.3 per cent in value, compared with 1956, from \$29.6 million to \$25.7 million. The items contributing mostly to the decrease were dried-salted cod, canned salmon, fish meal and industrial herring oil.

CANADA

Le rendement de la pêche maritime sur la côte de l'Est a été satisfaisant en mars, mais la pêche au hareng en Colombie-Britannique n'a pas donné autant que l'année dernière. Il en résulte que, au regard du mois correspondant de 1956, le volume et la valeur du poisson débarqué ont baissé, respectivement, de 20 et 8 p. 100. Les débarquements du premier trimestre ont diminué, respectivement, en volume et en valeur, de 460 millions de livres et de \$11,100,000 en 1956 à 290 millions de livres et \$7,700,000 cette année. Les médiocres résultats de la pêche au hareng sur la côte de l'Ouest ainsi que de la morue et de l'aiglefin sur la côte de l'Est sont les principales causes du changement.

COTE DE L'ATLANTIQUE

Grâce aux débarquements accrus de poissons plats - soles ou plies - et de homards, la pêche sur la côte de l'Atlantique en mars cette année a donné 43,700,000 livres de poisson d'une valeur de près de deux millions de dollars, soit un peu plus que l'année dernière. Toutefois, pour le premier trimestre, les chiffres ont été, respectivement, de 100.8 millions de livres et \$4.5 millions, soit de 24.2 et 25.0 p. 100 plus bas qu'en 1956. La situation est attribuable aux faibles prises de morue et d'aiglefin au cours des deux premiers mois et au fléchissement des prix du homard. Un changement apporté en 1957 à la méthode de collection de la statistique de la pêche dans les Maritimes peut aussi y avoir contribué.

COLOMBIE-BRITANNIQUE

La prise de poisson en Colombie-Britannique a baissé de 67.9 millions de livres qu'elle a été en mars 1956 à 44,200,000 livres cette année, soit de 35 p. 100. En même temps, la valeur débarquée de la prise a fléchi de 26.3 p. 100. Les chiffres cumulatifs du premier trimestre ont suivi la même tendance. La diminution est due au rendement de la pêche au hareng au cours de l'hiver, lequel a été beaucoup plus faible que l'année dernière. Il convient de rappeler que la pêche au hareng avait atteint un niveau exceptionnellement élevé au cours de l'hiver de 1955-1956.

STOCKS ET EXPORTATIONS DE POISSON

Le total déclaré des stocks de poisson congelé a atteint 47.9 millions de livres à la fin de mars, soit une augmentation de 44.2 p. 100 sur le chiffre de l'année dernière à pareille date. Les stocks de produits comestibles du poisson (sans la boette et les aliments pour animaux) ont été de 29.2 millions de livres, soit 42 p. 100 plus élevés qu'il y a un an, le saumon du Pacifique et le flétan ayant le plus contribué à l'augmentation. Les stocks de filets de poisson de fonds congelés à l'état frais se sont établis à 8,400,000 livres, soit à peu près le même chiffre que l'année dernière.

Les exportations de poisson et de produits de la pêche pour le premier trimestre ont diminué de 13.3 p. 100 en valeur, de \$29.6 millions à \$25.7 millions. Les principaux items contribuant à cette diminution sont la morue séchée-salée, le saumon en conserve, la farine de poisson et l'huile industrielle de hareng.

A LOW YIELD OF THE COD AND HERRING FISHERIES

The yield of the British Columbia fisheries was satisfactory in April but, on the East Coast, the catch and its value were 20 per cent below those of the same month of 1956. For the first four months, the sea fish landings and landed values were respectively 35 and 30 per cent less than in the preceeding year. The mediocre results of the herring, cod and haddock fisheries so far in the year were the major factors contributing to the change. Lobster prices were also significantly less in the current year than in 1956.

ATLANTIC COAST

The landings of fish on the Atlantic Coast were 50.4 million lb. valued at \$2.6 million in April, compared with 63.3 million lb. and \$3.3 million in 1956. The run of herring was delayed this year at the Magdalen Islands and the cod fisheries failed to achieve last year's level in Nova Scotia and Newfoundland. The catch and its value for the first four months were respectively 33 and 24 per cent less than in the previous year. This was largely due to a low catch of groundfish and to a downward trend in lobster prices thus far in the year. A change in the method of collection of fisheries statistics in the Maritimes in 1957 may somewhat contribute to the recorded changes.

BRITISH COLUMBIA

The catch of fish in British Columbia declined somewhat compared with April 1956 but its value was greater than in the previous year. However, the cumulative figures for the first four months, at 195.4 million lb. and \$3.8 million, were respectively 42 and 32 per cent less than in 1956. This was the result of the lower yield of the winter herring fishery in the first months of 1957 than in the previous year.

INVENTORIES OF FISH AND EXPORTS

The total reported stocks of frozen fish were 44.8 million lb. at the end of April, 23.5 per cent higher than last year. The increase was mainly accounted for by heavier inventories, this year than in 1956, of salmon and halibut originating from the West Coast. Bait and animal foods supplies were also greater this year than last, but these stocks were significantly less than a month ago. The inventories of fresh-frozen groundfish fillets, at 10.2 million lb., were slightly less than last year at the same date.

The stocks of salted groundfish were reported higher this year than last, at the end of April. However, it is noteworthy that the coverage of firms reporting salted fish stocks has been increasing since mid-1955.

The exports of fish and fishery products in the first four months declined by 10 per cent in value from \$38.4 million in 1956 to \$34.4 million in the current year. The items contributing mainly to the decrease were dried-salted cod, canned salmon and herring industrial oil.

(1) Figures not fully comparable from year to year for the Atlantic Area. The 1957 figures for the Maritime Provinces give the cumulated monthly output of products, irrespective of the origin of the raw materials. The 1956 figures represent the disposition of the raw fish landed from month to month.

Table 4 - Stocks of Salted and Pickled Fish - Atlantic Coast (1)

Product and Species	APRIL 30th 1957	March 31st 1957	April 30th 1956

UN MOINDRE RENDEMENT DE LA PECHE AU HARENG ET A LA MORUE

Le rendement de la pêche a été satisfaisant sur la côte du Pacifique en avril, mais les prises et leur valeur sur la côte de l'Est ont enregistré un déclin de 20 pour cent. Pour les quatre premiers mois de l'année, les captures de poisson en eau salée ont diminué de 35 pour cent et leur valeur de 30 pour cent, comparativement à l'année dernière. Cette diminution est due principalement à un rendement diminué de la pêche au hareng et aux poissons de fonds. Le prix du homard fut aussi inférieur à celui de l'année précédente.

COTE DE L'ATLANTIQUE

Les prises de poisson sur la Côte de l'Est, en avril, s'établissent à 50.4 million de livres avec une valeur au pêcheur de \$2.6 millions, comparativement à 63.3 millions de livres et \$3.3 millions en 1956. L'arrivée du hareng a été retardée aux Iles-de-la-Madeleine et la pêche à la morue a donné médiocrement en Nouvelle-Ecosse et à Terre-Neuve. Les captures des quatre premiers mois furent de 33 pour cent inférieures à celles de 1956 et leur valeur a diminué de 24 pour cent. Ces résultats dépendent en grande partie du rendement diminué de la pêche au hareng et aux poissons de fonds jusqu'à date, ainsi que de la baisse du prix du homard.

COLOMBIE-BRITANNIQUE

Le rendement de la pêche en Colombie-Britannique a été quelque peu diminué en avril, comparativement à l'année dernière, mais la valeur s'est légèrement accrue. Toutefois la capture, pour les quatre premiers mois, est inférieure à celle de l'année précédente par 42 pour cent en quantité et 32 pour cent en valeur. Cette diminution tient au rendement fort diminué de la pêche au hareng, comparativement à 1956.

STOCK ET EXPORTATIONS DE POISSON

Le total déclaré des stocks de poisson congelé était de 44.8 millions de livres à la fin d'avril, soit une augmentation de 23.5 pour cent comparativement à l'année précédente. Le saumon et le flétan de la Côte-du-Pacifique furent les espèces contribuant le plus à l'augmentation. Les stocks de poissons pour boeuf ou pour alimentation animale étaient aussi élevés, mais enregistraient une diminution importante par rapport au mois précédent. Les stocks de filets de poissons de fonds étaient rapportés à 10.2 millions de livres, soit un peu inférieurs à ceux de 1956 à la même date.

Les stocks de poissons de fonds salés étaient rapportés plus élevés que ceux de l'année précédente. Il faut toutefois noter que le nombre des firmes faisant rapport a sensiblement augmenté depuis le milieu de 1955.

Les exportations de poisson pour les quatre premiers mois de l'année furent de \$34.4 millions, soit 10 pour cent inférieures à celles de 1956. Les principaux items contribuant à la diminution furent la morue salée-séchée, le saumon et l'huile industrielle de hareng.

A HEAVY CATCH OF GROUND FISH IN MAY.

The yield of the sea-fisheries in May increased by 10 per cent, from 144.1 million lb. in 1956 to 148.6 million lb., but the value declined by 5 per cent from \$9.5 million to \$9.0 million. The groundfish catch was heavy on both Coasts, but for the Atlantic Coast the landings of herring and of lobsters failed to reach the previous year's level. The five-month totals, at 495.7 million lb. and almost \$20.0 million, fell short of the 1956 figures by 26 per cent and 18 per cent respectively. In the early months of 1957, there was a low yield of the herring and groundfish fisheries and, up to the end of April, the lobster prices were also lower in the current year than in 1956.

ATLANTIC COAST - The landings of fish and shellfish on the Atlantic Coast in May were 129.0 million lb., valued at \$7.2 million, these figures being below those of last year by 1.5 per cent and 17.5 per cent respectively. The catch of groundfish was significantly greater than a year ago but this was more than offset by lower landings of pelagic fish and of lobsters.

May is the peak month for the lobster fishery. The catch for the month was 14.8 million lb., valued at \$4.4 million. This was 3.0 million lb. and \$0.7 million less than in 1956. However, the average price for lobsters during May was somewhat higher than a year ago, reversing the picture of the first four months.

Compared with 1956, the cumulative figures to the end of May for the Atlantic Coast declined by 14 per cent in quantity and by 16 per cent in value. The change was largely due to a low yield of the groundfish and herring fisheries in the early months and to mediocre prices for lobsters up to the end of April. A change in the method of collection of fishery statistics in the Maritimes in 1957 may also contribute to the recorded change.

BRITISH COLUMBIA - The catch of fish for May in British Columbia reached 19.6 million lb., valued at \$1.9 million. Compared with the same month of 1956, the landings rose by 49 per cent and their value were up by almost 6 per cent. The halibut fishing season opened earlier in 1957 - at May 1st - and this contributed substantially to the increase in landings. However, the substantial carry over of cold storage stocks of halibut from 1956 resulted in the unit prices being significantly reduced.

The herring fishery was also successful in May but, in view of the rather low unit price for this species, this fishery contributed much more to the increase in volume than in value. For the first five months, the figures record a decline in the British Columbia fisheries of 38 per cent in quantity and 28 per cent in value, compared with 1956. This was due mainly to a reduced yield of the herring fishery in the current year.

STOCKS OF FISH AND EXPORTS - The total reported stocks of frozen fish were 50.7 million lb., at the end of May, i.e. 26 per cent higher than last year. The increase was mainly accounted for by heavier inventories of halibut and salmon originating from the West Coast. The holdings of the freshwater species and of animal foods were also greater than a year ago. However, this was partially offset by a decline of 17 per cent in the inventories of groundfish fillets, from 12.6 million lb. in 1956 to 10.4 million lb. this year.

The exports of fish and fishery products in the first five months declined by 11 per cent in value, from \$48.4 million to \$43.1 million. The items contributing mainly to the decrease were dried-salted cod, canned salmon, fresh lobsters and herring meal and oil.

(1) Figures for Nova Scotia and New Brunswick are not fully comparable from year to year due to change of method in collecting catch statistics in 1957. This change also affects the Atlantic Coast totals.

(2) Excluding the value of seals for Quebec where 259 were caught in May and 15,836 for Jan. - May.

(1) Figures not fully comparable from year to year for the Atlantic Area. The 1957 figures for the Maritime Provinces give the cumulated monthly output of products, irrespective of the origin of the raw materials. The 1956 figures represent the disposition of the raw fish landed from month to month.

CAPTURE IMPORTANTE DE POISSONS DE FOND EN MAI

Le rendement de la pêche maritime en mai montre un accroissement de 10 pour cent en quantité comparativement à l'année dernière, mais une diminution de 5 pour cent en valeur. Les prises furent de 148.6 millions de livres, avec une valeur de 9.0 millions de dollars. Les captures de poissons de fond furent importantes, mais les prises de hareng et de homard pour la région de l'Atlantique furent inférieures à celles de l'année précédente.

Les prises des cinq premiers mois furent de 495.7 millions de livres avec une valeur de près de 20.0 millions de dollars, enregistrant une diminution de 26 et 18 pour cent respectivement comparativement à 1956. Pour les premiers mois de 1957, le rendement de la pêche au hareng et aux poissons de fond a été médiocre et le prix du homard, jusqu'à la fin d'avril, a été plus bas durant l'année en cours qu'en 1956.

COTE DE L'ATLANTIQUE - Les débarquements de poissons, mollusques et crustacés sur la côte de l'Atlantique furent de 129.0 millions de livres en mai, avec une valeur de 7.2 millions de dollars. Ces chiffres étaient respectivement de 1.5 et 17.5 pour cent inférieurs à ceux de l'année précédente. Les captures de poissons de fond étaient plus élevées qu'en 1957, mais celles d'espèces pélagiques et du homard étaient inférieures.

Le maximum du rendement de la pêche au homard se réalise en mai. Les prises pour le mois furent de 14.8 millions de livres, ayant une valeur de 4.4 millions de dollars. Ces chiffres étaient inférieurs par 3.0 millions de livres et 0.7 millions de dollars à ceux de 1956. Toutefois, le prix moyen du homard était supérieur à celui de l'année précédente en mai et c'était là un changement par rapport aux mois précédents.

En comparaison de 1956, les chiffres cumulatifs pour la côte de l'Est, à la fin de mai, enregistraient une diminution de 14 pour cent en quantité et de 16 pour cent en valeur. Le changement était principalement dû au bas rendement de la pêche au hareng et aux poissons de fond au cours des premiers mois de l'année et au prix médiocre pour le homard jusqu'à la fin d'avril. Une modification des méthodes de collection des statistiques dans les Provinces Maritimes en 1957 peut avoir contribué au changement rapporté.

COLOMBIE-BRITANNIQUE - Les débarquements de poissons en mai en Colombie-Britannique furent élevés, s'établissant à 19.6 millions de livres et 1.9 millions de dollars. En comparaison du même mois en 1956, c'était une augmentation de 49 pour cent en quantité et de près de 6 pour cent en valeur. La saison de pêche au flétan a commencé plus tôt en 1957 - au premier mai - et cela a contribué sensiblement à l'augmentation des prises. Toutefois, les stocks importants de flétan congelé en entreposage ont causé une diminution importante du prix.

La pêche au hareng a aussi été très fructueuse en mai mais, en raison du bas prix de cette espèce, cette pêche a contribué davantage à l'augmentation en volume qu'en valeur. Pour les cinq premiers mois de l'année, les pêcheries de cette province enregistrent pourtant une baisse de 38 pour cent pour les débarquements et de 23 pour cent en valeur, surtout à cause du rendement diminué de la pêche au hareng en 1957.

STOCKS ET EXPORTATIONS - Le total déclaré des stocks de poisson congelé était de 50.7 millions de livres à la fin de mai, soit une augmentation de 26 pour cent par rapport à l'année précédente. Le flétan et le saumon de la Côte-du-Pacifique furent les espèces contribuant le plus à l'augmentation. Les exportations de poisson pour les cinq premiers mois de l'année furent de 43.1 millions de dollars, soit 11 pour cent inférieures à celles de l'année dernière. Les principaux produits contribuant à la diminution furent la morue salée-séchée, le saumon en conserve, le homard frais, la farine de hareng et l'huile de hareng.

LOW LANDINGS OF COD AND SALMON

The landings of sea-fish in June dropped by 18 per cent, compared with 1956, and the value was down by 16 per cent. This was largely a result of the failure of the cod-trap fishery in Newfoundland and of a low catch of salmon and halibut on the West Coast. The low yield of the salmon fisheries was the result of the strike of net fishermen, starting June 22. Cumulative landings for the first six months were 676.4 million pounds valued at \$29.9 million, falling short of the past year's figures by 24 and 18 per cent respectively.

ATLANTIC COAST - The landings of fish and shellfish on the Atlantic Coast in June declined by 26 per cent, to 146.6 million pounds from 196.5 million last year and the value dropped by 13 per cent, to \$7.5 million from \$8.6 million in 1956. The failure of the cod-trap fishery in Newfoundland, because of ice conditions, largely accounted for this decline. The landings of cod for this province were only 29.5 million pounds, against 61.4 million in June 1956. The take of caplin also dropped to 701,000 pounds from 11.6 million pounds in the preceding year.

The yield of the fisheries in the other Atlantic Coast provinces was generally satisfactory. However, the redfish catch declined to 3.1 million pounds, in Nova Scotia, from 5.1 million last year; in New Brunswick, the landings of alewives were 4.4 million pounds, against 9.9 million a year ago and those of lobster declined to 1.4 million pounds valued at \$431,000 from 1.8 million pounds and \$570,000 in 1956.

BRITISH COLUMBIA - The catch of fish for June in British Columbia was 33.9 million pounds valued at \$2.4 million. Compared with the same month of 1956, the landings rose by 43 per cent but the value was down by 25 per cent. The herring catch totalled 20.4 million pounds, the heaviest on record for this time of the year. However, in view of the low unit price for this species, it contributed much more to a rise in volume than to offsetting the decline in value.

The drop in value for June was mainly due to the reduced landings of halibut and salmon compared with 1956. The halibut catch was 2.1 million lb. and \$680,000 less than in the preceding year and the salmon catch declined from 4.4 million pounds valued at \$1.2 million in 1956 to 3.6 million pounds and \$870,000 in the current year. The low salmon landings were the result of the strike of the net fishermen from June 22 to July 13. For the first six months of the year the catch and its value in British Columbia were down by 33 and 24 per cent respectively, due to the low catch of herring and salmon this year as well as to lower prices for halibut in 1957 than in the preceding year.

STOCKS OF FISH AND EXPORTS - The total reported stocks of frozen fish were 57.8 million pounds at the end of June, i.e. 9 per cent higher than last year. The stocks of Pacific salmon were 4.2 million pounds, against 1.9 million a year ago and the freshwater species totalled 6.6 million pounds, compared with 3.4 million in 1956. On the other hand, the inventories of groundfish fillets (including fish blocks) declined to 14.3 million pounds, from 16.5 million in the preceding year.

The exports of fish and fishery products for the first six months declined by 11 per cent to \$53.4 million from \$60.0 million in 1956. The items contributing mostly to the decrease were lobsters and dried salted cod from the East Coast, herring oil and meal as well as canned salmon from the West Coast.

- (1) Figures for Nova Scotia, New Brunswick and Prince Edward Island are not fully comparable from year to year due to change of method in collecting catch statistics in 1957. This change also affects the Atlantic Coast totals.
- (2) Excluding the value of seals for Quebec.
- (3) No landed value available as all landings occurred in Quebec.

(1) Figures not fully comparable from year to year for the Atlantic Area. The 1957 figures for the Maritime Provinces give the cumulated monthly output of products, irrespective of the origin of the raw materials. The 1956 figures represent the disposition of the raw fish landed from month to month.

Table 4 - Stocks of Salted and Pickled Fish - Atlantic Coast (1)

BAS RENDEMENT DE LA PECHE A LA MORUE ET AU SAUMON

Les débarquements de poisson d'eau salée en juin furent de 18 pour cent inférieurs à ceux de l'année précédente et la valeur a diminué de 16 pour cent. La pêche aux trappes pour la morue fut in fiasco à Terre-Neuve et les prises de saumon et de flétan ont été très médiocres en Colombie-Britannique. La pêche au saumon a été influencée par la grève des pêcheurs aux filets. Les débarquements pour les premiers six mois furent de 676,376,000 livres avec une valeur de \$29,930,000, soit une diminution de 24 pour cent en volume et de 18 pour cent en valeur comparativement à 1956.

COTE DE L'ATLANTIQUE - Les débarquements de poissons, mollusques et crustacés sur la côte de l'Atlantique en juin furent de 146,550,000 livres, soit une diminution de 26 pour cent par rapport à 1956; la valeur, à \$7,503,000, montrait un déclin de 13 pour cent. La pêche aux trappes pour la morue à Terre-Neuve a été pratiquement nulle, en raison de la glace, et ceci fut un facteur majeur du déclin par rapport à l'année dernière. Les prises de morue furent de 29,463,000 livres à Terre-Neuve comparativement à 61,444,000 livres en 1956. Les prises de caplan ont été de seulement 701,000 par rapport à 11,597,000 livres l'année précédente.

D'autre part le rendement de la pêche dans les autres provinces de l'Atlantique a été satisfaisant. Toutefois les prises de perche rose en Nouvelle-Ecosse ont diminué, de 5,053,000 livres en 1956 à 3,079,000 livres cette année; au Nouveau-Brunswick les prises de gaspateau et celles du homard ont aussi considérablement diminué comparativement à l'année précédente.

COLOMBIE-BRITANNIQUE - Les débarquements de poissons en Colombie-Britannique furent de 33,849,000 livres en juin avec une valeur de \$2,453,000. Comparativement à 1956 c'était une augmentation de 43 pour cent en quantité mais une diminution de 25 pour cent en valeur. Les captures de hareng furent de 20,372,000 livres, soit une capture record à ce temps de l'année. La valeur de cette espèce étant peu élevée, cette pêche affecte pourtant beaucoup plus le volume que la valeur.

La diminution par rapport à juin 1956 dépendait surtout des captures diminuées de saumon et de flétan. Les débarquements de flétan furent inférieurs à ceux de l'année précédente par 2.1 millions de livres et \$680,000. Les captures de saumon furent de 3,655,000 livres ayant une valeur de \$870,000, par rapport à 4,365,000 livres et \$1,165,000 en 1956. La grève des pêcheurs aux filets, du 22 juin au 13 juillet, a causé la diminution des prises de saumon. Pour les six premiers mois de l'année les débarquements et leur valeur ont diminué par 33 et 24 pour cent respectivement, à cause de la prise peu élevée de hareng et de saumon cette année et aussi en raison d'un fléchissement des prix du flétan par rapport à 1956.

STOCKS ET EXPORTATIONS - Le total déclaré des stocks de poisson congelé était de 57,875,000 livres à la fin de juin, soit 9 pour cent de plus que l'année dernière. Les stocks de saumon étaient de 4,206,000 livres, contre 1,887,000 livres en 1956 et le total des espèces d'eau douce était de 6,630,000 livres comparativement à 3,453,000 livres l'année précédente. D'autre part les stocks de filets de poissons de fonds s'établissaient à 14,297,000 livres comparativement à 16,490,000 livres en 1956.

Les exportations des produits de la pêche enregistraient une diminution de 11 pour cent par rapport à l'année dernière, le total s'établissant à \$53,446,000. Les items contribuant le plus à la diminution étaient le homard et la morue séchée de la côte de l'Est, le saumon en conserve, la farine et l'huile de hareng de la côte du Pacifique.

LOW LANDINGS OF PACIFIC SALMON IN JULY

The total landings of fish in July were 348.6 million pounds valued at \$14.7 million. This was 2 per cent more than last year in volume but 17 per cent less in value. The drop in value was largely explained by a reduced yield of the salmon fisheries in British Columbia, because of the strike of the net fishermen and of unfavourable factors affecting the sockeye fishery. The groundfish and lobster fisheries also yielded at a reduced level, compared with 1956.

For the period January-July cumulative landings declined by 18 per cent, to 1,022 million pounds from 1,242 million in 1956; the landed value fell by 17 per cent to \$44.7 million from \$53.8 million in the preceding year. Practically all the major fisheries contributed to the decline, on both coasts.

BRITISH COLUMBIA - The catch of fish for July in British Columbia increased by 2.5 per cent to 53.5 million pounds from 52.2 million last year, but the landed value fell by 27 per cent to \$6.7 million from \$9.3 million in 1956. The landings of herring, sablefish and lingcod were heavy but those of salmon, at 31.9 million pounds, were 3.7 million pounds less than a year ago. The value of salmon was \$5.6 million in July, against almost \$8.0 million in the preceding year. The decline of the salmon fishery was in part the result of the strike of the salmon net fishermen which commenced in June and continued until July 13; the catch of sockeye salmon was also below average in most of the producing areas.

The cumulative landings to the end of July declined by 28.5 per cent to 302.4 million pounds from 433.4 million in 1956 and the value landed fell by 26 per cent to \$14.8 million from almost \$20 million a year ago. All the major fisheries - salmon, halibut and herring - contributed to this decline. While the halibut take was about equal to that of the preceding year, its value was significantly less because of the decline in unit prices for halibut from 1956.

ATLANTIC COAST - The catch of fish and shellfish in July for the Atlantic Coast was virtually the same than a year ago but the value, at \$8.0 million, was 3 per cent less than in 1956. The landings of cod, haddock and redfish were less than in the preceding year and the lobster catch declined to 1.6 million pounds and \$467,000 from 2.0 million and \$647,000 in 1956. On the other hand, the take of herring was heavy and reached 28.4 million pounds, against 17.5 million a year ago.

Cumulative landings from January were 12 per cent less than in 1956 for quantity and value. The decline was largely due to a smaller catch of groundfish and to a lower yield of the lobster fishery this year than last.

STOCKS OF FISH AND EXPORTS - The total reported stocks of frozen fish were 66.8 million pounds at the end of July, 2 per cent less than in the preceding year. The holdings of groundfish fillets and of animal foods were less than a year ago, but this was more than offset by increased stocks of the inland species, Pacific halibut and salmon. Cumulative freezings of fish to the end of July were 131.4 million pounds or 2 per cent more than in 1956.

The exports of fishery products for the first seven months of the year declined by 6.5 per cent, to \$67.8 million from \$72.4 million in 1956. The items contributing mostly to the decrease were herring oil and meal, canned salmon and fresh lobsters.

(1) Figures for Nova Scotia, New Brunswick and Prince Edward Island are not fully comparable from year to year due to change of method in collecting catch statistics in 1957. This change also affects the Atlantic Coast totals.

(2) Excluding the value of seals for Quebec.

(3) No landed value available as all landings occurred in Quebec.

(1) Figures not fully comparable from year to year for the Atlantic Area. The 1957 figures for the Maritime Provinces give the cumulated monthly output of products, irrespective of the origin of the raw materials. The 1956 figures represent the disposition of the raw fish landed from month to month.

Table 4 - Stocks of Salted and Pickled Fish - Atlantic Coast (1)

BAS RENDEMENT DE LA PECHE AU SAUMON DU PACIFIQUE.

Les débarquements de poisson d'eau salée furent de 348,614,000 livres, avec une valeur de \$14,688,000 en juillet. Ces chiffres représentent une augmentation de 2 pour cent en quantité, par rapport à l'année dernière, mais une diminution de 17 pour cent en valeur. Cette dernière diminution était principalement due au rendement moindre de la pêche au saumon en Colombie-Britannique, en raison de la grève des pêcheurs aux filets et de facteurs adverses dans la pêche du saumon sockeye. En plus, la pêche au poisson de fond et au homard n'a pas été aussi favorable que l'an dernier.

Pour les sept premiers mois de l'année, il y eût une diminution de 18 pour cent dans les captures et de 17 pour cent dans la valeur au pêcheur. En pratique, toutes les pêches importantes ont contribué à cette diminution sur les deux côtes.

COLOMBIE-BRITANNIQUE - Les captures de poisson en juillet furent de 2.5 pour cent supérieures à celles de l'année dernière en quantité, mais la valeur diminuait de 27 pour cent. Les débarquements de hareng, de morue charbonnière et de morue lingue furent importants mais ceux du saumon, étant rapportées à 31,857,000 livres, représentaient une diminution de 3,700,000 livres par rapport à ceux de l'année précédente. La valeur au pêcheur du saumon fut de \$5,558,000, contre \$7,981,000 en 1956. La diminution de la pêche au saumon fut attribuable à la grève des pêcheurs aux filets, grève commencée en juin et terminée le 13 juillet, comme à certaines conditions adverses pour la pêche du sockeye.

Les débarquements cumulatifs jusqu'à fin juillet ont diminué de 28.5 pour cent en quantité et de 26 pour cent en valeur. Toutes les pêches d'importance majeure - au saumon, au flétan et au hareng - ont contribué à la diminution. Les prises de flétan ont été à peu près égales pour les deux années, mais le prix a diminué sensiblement en 1957.

COTE DE L'ATLANTIQUE - Les débarquements en juillet pour la côte de l'Atlantique ont été à peu près équivalents à ceux de l'année précédente mais la valeur accusa une diminution de 3 pour cent. Les prises de morue, d'aiglefin et de perche rose furent inférieures à celles de l'année précédente et la pêche au homard a donné 1,551,000 livres avec une valeur de \$467,000, contre 2,007,000 livres et \$647,000 en 1956. D'autre part la pêche au hareng a fourni un apport de 28,366,000 livres, en comparaison de 17,471,000 livres l'année précédente.

Les chiffres cumulatifs à partir de janvier accusent une diminution de 12 pour cent en quantité et en valeur. Cette diminution s'explique principalement par des captures inférieures de poisson de fond et de homard cette année, comparativement à 1956.

STOCKS ET EXPORTATIONS - Le total déclaré des stocks de poisson congelé était de 66,783,000 livres à la fin de juillet, soit une augmentation de 2 pour cent par rapport à 1956. Les stocks de filets de poisson de fond et de produits pour alimentation animale étaient moindres que ceux de l'année précédente; par contre, ceux de flétan et saumon du Pacifique ainsi que des espèces d'eau douce étaient supérieurs. La congélation des produits pour les sept premiers mois, s'établissant à 131,406,000 livres, était aussi de 2 pour cent supérieure au chiffre de 1956.

Les exportations des produits de la pêche, pour les sept premiers mois de l'année diminuaient de 6.5 pour cent par rapport à l'année dernière et s'établissaient à \$67,764,000 (\$72,451,000 en 1956). Les produits contribuant à la diminution furent l'huile et la farine de hareng, le saumon en conserve et les homards frais.

HEAVY COD LANDINGS IN NEWFOUNDLAND FOR AUGUST

The total landings of sea fish and shellfish in August were 317.2 million pounds, valued at \$15.7 million. This was 15 per cent more than for the same month of last year in quantity and an increase of 8 per cent in the value. The cod fisheries yielded at high level in Newfoundland and salmon fishing on the West Coast was more successful in August last than in the same month of 1956.

For the period January-August the total catch declined by 13 per cent to 1,325.1 million pounds from 1,519.7 million in 1956; the landed value fell by 12 per cent to \$60.3 million from \$68.4 million in the preceding year. Practically all the major fisheries contributed to the decrease, on both coasts.

BRITISH COLUMBIA - The value of all landings during August in British Columbia increased by 11 per cent to \$8.2 million from \$7.3 million in 1956, due mainly to a change in the salmon fishery. This fishery yielded 56.2 million pounds valued at \$7.4 million, against 41.7 million pounds and \$6.2 million in 1956, thus showing increases of 34 per cent in quantity and of 20 per cent in value. The landings of pink and sockeye were substantially heavier than a year ago, while those of coho declined somewhat.

The catch of halibut was nearly equal to that of 1956, but its value fell significantly. The landings of all species, at 63.5 million pounds, were 10 per cent less than in the preceding year for the same month, as a result of a low yield of the herring fishery. Very few seiners operated on herring during August and as a result landings were light and totalled 1.3 million pounds versus 22.4 million in 1956.

The January-August landings decreased by 26 per cent to 365.9 million pounds from 493.8 million in 1956. However it is to be noted that the 1956 yearly catch was an all time record. The value of the catch since the beginning of the year fell by 16 per cent to \$23.0 million from \$27.3 million in 1956, reflecting a loss of income from all the major fisheries - halibut, herring and salmon.

ATLANTIC COAST - The catch of fish and shellfish in August for the Atlantic Coast climbed by 23 per cent to 253.7 million pounds from 206.4 million in 1956, while the landed value increased by 4 per cent to \$7.5 million from \$7.2 million. Cod and herring were the main species contributing to the change. The cod catch reached 156.0 million pounds valued at \$3.5 million, against 120.7 million pounds and \$2.7 million a year ago. This increase was largely accounted for in the province of Newfoundland due to the unexpected extension of the cod trap fishery which in many areas was still accounting for large catches at the end of the month. Usually cod trap fishing ends at about mid-August.

Fishing for herring was particularly successful in New Brunswick and Nova Scotia. On the other hand, the lobster fishery obtained only mediocre results in district 8 which was opened to fishing on August 10. The lobster landings fell by 30 per cent to 3.8 million pounds from 5.3 million in the same month of 1956; the value landed declined by 34 per cent to \$1.1 million from \$1.6 million in the preceding year.

The January-August landings fell by 7 per cent for the Atlantic Coast to 959.1 million pounds from 1,025.9 million in 1956. The landed value dropped by 9 per cent to \$37.3 million from \$41.1 million in 1956. A low yield of the lobster fishery as well as of the groundfish fisheries in the current year appears to account largely for the decline. Groundfish landings were 6 per cent less than those of 1956 at the end of August, while the lobster catch showed a drop of 16 per cent.

(1) Figures not fully comparable from year to year for the Atlantic Area. The 1957 figures for the Maritime Provinces give the cumulated monthly output of products, irrespective of the origin of the raw materials. The 1956 figures represent the disposition of the raw fish landed from month to month.

Table 4 - Stocks of Salted and Pickled Fish - Atlantic Coast (1)

TERRE-NEUVE ENREGISTRE DE LOURDS DEBARQUEMENTS

DE MORUES EN AOÛT

Les débarquements de poissons et de crustacés et mollusques de mer, en août, ont atteint 317,214,000 livres, d'une valeur de \$15,669,000. Au regard du même mois, l'an dernier, ces chiffres représentent une augmentation de 15 p. 100 quant au volume et de 8 p. 100 quant à la valeur. La pêche de la morue a donné un haut rendement à Terre-Neuve et celle du saumon sur la côte occidentale a été plus heureuse en août 1957 qu'au cours du même mois, l'an dernier.

Relativement à la période janvier-août, la prise totale a été réduite de 13 p. 100 et s'est établie à 1,325,065,000 livres en 1957, comparativement à 1,519,714,000 en 1956; la valeur débarquée a diminué de 12 p. 100 (\$60,321,000 contre \$68,401,000). En général, toutes les principales pêches, sur les deux côtes, ont figuré à la baisse.

Colombie-Britannique Dans la province du Pacifique, la valeur de tous les débarquements, en août 1957, s'est accrue de 11 p. 100 (\$8,165,000 contre \$7,372,000) par suite, surtout, de changements dans la pêche du saumon. Cette dernière a donné 56,194,000 livres pour une valeur de \$7,443,000, en comparaison de 41,743,000 livres et de \$6,181,000 un an plus tôt; c'était un accroissement de 34 p. 100 en volume et de 20 p. 100 en valeur. Les débarquements de saumon rose et rouge ont été plus considérables qu'un an auparavant, alors que ceux de saumon argenté ont quelque peu décliné.

La prise de flétan s'est pratiquement maintenue au même niveau qu'en 1956, mais sa valeur a fortement diminué. Par suite du bas rendement de la pêche du hareng, les débarquements de toutes les espèces (63,549,000 livres) ont été inférieures de 10 p. 100 à celles du même mois, l'an dernier. Peu de pêcheurs à la seine se sont adonnés à la pêche du hareng en août et, conséquemment, les débarquements ont été légers et ne se sont chiffrés que par 1,329,000 livres (22,394,000 en 1956).

Au cours de janvier-août, les débarquements en 1957 ont baissé de 26 p. 100 sur 1956 (365,927,000 livres contre 493,843,000). Toutefois, il faut observer que la prise, au cours de 1956, avait atteint des chiffres sans pareil. Durant les huit premiers mois, la valeur de la prise en 1957 est tombée de 16 p. 100 au regard de 1956 (\$22,998,000 contre \$27,338,000), reflétant une baisse des recettes provenant des principales pêches, - flétan, hareng et saumon.

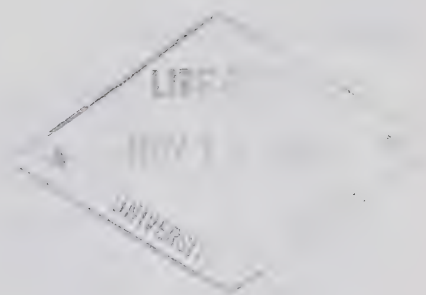

Côte de l'Atlantique La prise de poissons et de crustacés et mollusques sur la côte atlantique, en août, a grimpé de 23 p. 100 par rapport à un an plus tôt (253,665,000 livres contre 206,358,000), alors que la valeur débarquée est montée de 4 p. 100 (\$7,504,000 contre \$7,178,000). La morue et le hareng sont les principales espèces qui ont contribué à ce changement. La prise de morues a atteint 156,029,000 livres d'une valeur de \$3,456,000, comparativement à 120,686,000 livres et à \$2,764,000 une année auparavant. Ce sont les pêches de Terre-Neuve qui ont le plus largement contribué à cet accroissement grâce à la continuation inattendue de la pêche au piège qui, dans plusieurs districts, donnait encore des prises considérables à la fin du mois. Ordinairement, la pêche au piège de la morue se termine à la mi-août.

La pêche du hareng a été particulièrement heureuse au Nouveau-Brunswick et en Nouvelle-Ecosse. D'autre part, la prise du homard n'a donné que des résultats médiocres dans le district no 8 qui n'a été ouvert à la pêche que le 10 août. Les débarquements de homard ont diminué de 30 p. 100 (3,761,000 livres contre 5,331,000) et la valeur débarquée a baissé de 34 p. 100 (\$1,087,000 contre \$1,637,000).

Durant janvier-août, les débarquements sur la côte atlantique, en 1957, ont été réduits de 7 p. 100 par rapport à 1956 (959,147,000 livres contre 1,025,871,000). La valeur débarquée a reculé de 9 p. 100 (\$37,317,000 contre \$41,063,000). Le bas rendement, durant la présente année, de la pêche du homard et de celle des poissons de fond semble expliquer en grande partie ce recul. Les débarquements de poissons de fond ont diminué de 6 p. 100 sur la même période de 1956, et ceux de homard ont accusé une réduction de 16 p. 100.

HEAVY FISH LANDINGS IN SEPTEMBER

The total landings of sea fish and shellfish in September was 211,102,000 pounds valued at \$8,474,000. This was 14 per cent more than last year in quantity but 7 per cent less in value. The catch was heavy on both coasts but the value declined significantly in British Columbia, compared with 1956, mainly due to a low catch of the coho and halibut species.

For the period January - September, the total catch declined by 10 per cent to 1,546,020,000 from 1,723,038,000 in 1956 and the value fell by 11 per cent to \$68,848,000 from \$77,338,000. The decline was more significant in British Columbia than for the East Coast.

British Columbia - The catch of fish in British Columbia for September increased by 11 per cent to 52,899,000 pounds from 47,730,000 pounds a year ago but the value, at \$3,394,000, was 23 per cent less than last year. Heavy pink landings contributed mostly to the increase in volume but a small catch of the more valuable coho species brought the salmon value down, compared with September 1956. The halibut season terminated in Commission Area 3A on September 22 and the halibut landings were slightly below one million pounds valued at \$178,000, against 3,030,000 pounds and \$688,000 in the corresponding month of last year.

The January - September landings dropped by 23 per cent to 418,826,000 from 541,573,000 and the value fell by 17 per cent to \$26,392,000 from \$31,759,000 a year ago, reflecting a loss of income from all the major fisheries.

Atlantic Coast - The landings of fish and shellfish in September for the Atlantic Coast climbed by 15 per cent to 158,203,000 pounds from 137,107,000 a year ago; the value was also up by 12.5 per cent to \$5,080,000 from \$4,514,000. A heavy yield of the cod, herring and lobster fisheries was mainly responsible for this increase. The cod catch increased to 75,065,000 pounds valued at \$2,694,000 from 66,122,000 pounds and \$2,560,000 in September 1956, the province of Newfoundland contributing mostly to this increase. The catch of lobster in district 8 was 3,734,000 pounds valued at \$1,102,000 against 2,580,000 pounds and \$792,000 in 1956. The take of herring was very heavy in New Brunswick and Nova Scotia.

Cumulative figures for the period January - September show a decline of 5 per cent in volume (1,127,203,000 pounds versus 1,181,465,000) and of 7 per cent in value (\$42,450,000 against \$45,579,000). Statistics indicate that the groundfish and the lobster fisheries mainly accounted for the decrease. However, a change in the method of collecting catch statistics may also account for part of the recorded change.

Inland Fishing - Up to the end of August, the Ontario fisheries have kept close to previous year's level when an all time record was established. The catch was reported at 20,017,000 pounds valued at \$2,234,000 versus 20,404,000 pounds and \$2,428,000 in 1956. Yellow perch and smelts landings were particularly heavy this year but this was offset by a smaller catch, than in 1956, for blue and yellow pickerel, trout and whitefish.

For the first eight months of the year, the catch in the province of Manitoba declined to 14,642,000 pounds and \$1,569,000 from 15,864,000 and \$1,790,000 in 1956, reflecting a lower yield of the most important fisheries - yellow pickerel, whitefish and sauger. Combined results of the winter and summer operations in the Northwest Territories show virtually no change in totals compared with the preceding year, the increase in the whitefish catch being offset by a decline for trout.

Stocks of Fish and Exports - The total reported stocks of frozen fish were 73,868,000 pounds at the end of September, a drop of 16 per cent compared with 1956. Bait, Pacific salmon and halibut were the main items contributing to the change. Smaller amounts of groundfish fillets were also held at the end of the month than in 1956.

The exports of fish and fishery products for the first eight months of the year were down by 3.5 per cent to \$81,779,000 from \$84,752,000 in 1956. The exports of fresh or frozen fish products were up generally, as well as those of salted groundfish, however this was more than offset by smaller exports, this year than last, for canned pink salmon, alive lobsters, herring oil and meal.

DE LOURDS DÉBARQUEMENTS EN SEPTEMBRE

Les débarquements de poisson de mer et de mollusques et crustacés, en septembre, ont atteint 211,102,000 livres d'une valeur de \$8,474,000. Ces chiffres, comparés à ceux d'un an plus tôt, représentent une augmentation de 14 p. 100 quant au volume et une diminution de 7 p. 100 quant à la valeur. Sur les deux côtes, la prise a été abondante, mais, comparativement à 1956, la valeur a été fort réduite en Colombie-Britannique par suite d'une petite pêche de coho et de flétan.

Relativement à la période janvier-septembre, la prise de 1957 a diminué de 10 p. 100 sur 1956 (1,546,020,000 livres contre 1,723,038,000) et sa valeur, de 11 p. 100 (\$68,848,000 contre \$77,338,000). Le recul a été plus marqué en Colombie-Britannique que sur la côte orientale.

Colombie-Britannique - Dans cette province, la prise de septembre, en 1957, s'est accrue de 11 p. 100 sur 1956 (52,899,000 livres contre 47,730,000), mais la valeur (\$3,394,000) a déchu de 23 p. 100. Grâce principalement à de lourds débarquements de saumon rose, le volume débarqué du saumon a augmenté, mais sa valeur a diminué par suite d'une prise moins abondante de l'espèce plus précieuse qu'est le coho. Dans la zone 3A, la saison du flétan s'est terminée le 22 septembre et les débarquements de cette espèce sont légèrement descendus au-dessous d'un million de livres pour une valeur de \$178,000, en comparaison de 3,030,000 livres et de \$688,000 le mois correspondant de l'an dernier.

Durant janvier-septembre, les débarquements sont tombés de 23 p. 100 (418,826,000 livres en 1957 contre 541,573,000 en 1956) et la valeur, de 17 p. 100 (\$26,392,000 contre \$31,759,000). Cette réduction de valeur refléchissait une diminution des recettes quant à toutes les grandes pêches.

Côte de l'Atlantique - Les débarquements de poisson et de mollusques et crustacés sur la côte de l'Atlantique, en septembre, ont grimpé de 15 p. 100 (158,203,000 livres en 1957 contre 137,107,000 en 1956) et leur valeur, de 12.5 p. 100 (\$5,080,000 contre \$4,514,000). L'abondance des pêches de la morue, du hareng et du homard est surtout comptable de cette augmentation. La prise de morue est montée à 75,065,000 (66,122,000 en 1956) livres d'une valeur de \$2,694,000 (\$2,560,000), et c'est Terre-Neuve qui figure principalement à cet accroissement. La prise de homard dans le district 8 s'est établie à 3,734,000 (2,580,000) livres pour une valeur de \$1,102,000 (\$792,000). La pêche du hareng a été considérable au Nouveau-Brunswick et en Nouvelle-Ecosse.

Les chiffres relatifs à la période janvier-septembre ont enregistré un recul de 5 p. 100 quant au volume (1,127,203,000 livres contre 1,181,465,000) et de 7 p. 100 quant à la valeur (\$42,450,000 contre \$45,579,000). Selon les statistiques, les pêches du poisson de fond et du homard sont principalement comptables de la baisse. Toutefois, cette dernière est peut-être due en partie à une nouvelle méthode de recueillir les données statistiques sur la pêche.

A l'intérieur du pays - Jusqu'à la fin d'août, les pêches de l'Ontario en 1957 ont conservé à peu près le même niveau qu'en 1956 alors que des chiffres inégaux avait été enregistrés. La prise s'est chiffrée par 20,017,000 livres d'une valeur de \$2,234,000, comparativement à 20,404,000 livres et à \$2,428,000 en 1956. Les débarquements de perchaude et d'éperlan ont été particulièrement lourds cette année, mais cette abondance a été compensée par une prise réduite de sandre, doré commun, truite et corégone.

Au cours des huit premiers mois, la prise au Manitoba est descendue de 15,864,000 livres et de \$1,790,000 en 1956 à 14,642,000 livres et à \$1,569,000 en 1957, par suite d'un rendement inférieur de la pêche des espèces les plus précieuses, - doré commun, corégone et doré noir. Les résultats d'ensemble des opérations d'hiver et d'été dans les Territoires du Nord-Ouest ne marquent pratiquement aucun changement par rapport à l'année dernière, car l'augmentation de la prise de corégone a été contre-balancée par la diminution de la pêche à la truite.

Les stocks et exportations - On a signalé que les stocks de poisson congelé s'établissaient à 73,868,000 livres à la fin de septembre pour une diminution de 16 p. 100 par rapport à la même date de 1956. La boëtte, le saumon du Pacifique et le flétan ont été les principaux articles qui ont figuré à la baisse. Dans la même comparaison, la quantité de filets de poisson de fond a également diminué.

Les exportations de poisson et des produits de la pêche, au cours des huit premiers mois de 1957, ont déchu de 3.5 p. 100 sur la même période de 1956 (\$81,779,000 contre \$84,752,000). Dans la même comparaison, les exportations de produits du poisson frais ou congelés ont généralement augmenté, de même que celles des produits salés du poisson de fond; néanmoins, cette augmentation a été plus que contre-balancée par la diminution accusée par les exportations de saumon rose en conserve, du homard vivant et de l'huile et de la farine de hareng.

	1956	1957	1956	1957
	'000 lb - 1000 liv.		\$'000 - 1000 dollars	
TOTAL IMPORTS - IMPORTATIONS TOTALES	8,457	9,008
FISH & SHELLFISH FR. or FZ. - Total - POISSON, MOLLUSQUES, ETC., FR. OU CONG.	1,042	1,341
Halibut, fresh - Flétan frais	824	1,344	155	295
Herring, fresh - Hareng frais	4,012	6,597	94	129
Salmon, fresh - Saumon frais	135	282	55	123
Other fish - Autres poissons	2,511	2,912	377	520
Lobsters fresh - Homard frais	55	47	37	30
Oysters, in shell (bbl.) - Huîtres en coquille (barils)	71	257	2	5
Oysters, shelled ('000 gal.) - Huîtres décoquillées (1000 gall.)	47	32	304	220
Squid fresh - Encornet frais	18	19
FISH SALTED AND SMOKED - Total - POISSON SALÉ ET FUMÉ	1,548	2,748	206	272
Herring salted - Hareng salé	1,150	1,096	120	135
United Kingdom - Royaume-Uni	387	411	43	54
Netherlands - Pays-Bas	276	248	38	40
Norway - Norvège	442	346	34	30
Other, salted, smoked or boneless - Autres poissons traités	398	647	86	137
FISH AND SHELLFISH PRESERVED - Total - POISSONS, MOLLUSQUES, ETC., CONSERVÉS.	5,313	5,327
Herring kippered, canned - Hareng légèrement fumé, en conserve	211	231	59	68
United Kingdom - Royaume-Uni	121	68	31	16
Norway - Norvège	90	152	28	48
Anchovies, Sardines canned - Anchois, sardines conservés	1,091	1,126	575	667
Norway - Norvège	624	731	328	449
Portugal - Portugal	215	217	126	124
United States - Etats-Unis	30	30	22	23
Tuna canned - Thon en conserve	685	1,334	265	441
Japan - Japon	676	1,304	259	428
Fish preserved in oil - Poisson conservé dans l'huile	231	288
Peru - Pérou	173	214
Salmon canned - Saumon en conserve	4,218	4,388	2,554	2,234
Japan - Japon	4,209	4,386	2,549	2,232
Herring canned - Hareng en conserve	214	236	48	58
Germany West - Allemagne occidentale	104	129	22	32
Other fish canned or preserved - Autres poissons en boîtes	184	192
Crabs, Clams, Shrimps, canned - Crabes, coques et crevettes en conserve ..	1,923	1,624	1,207	1,175
Japan - Japon	889	515	222	138
Norway - Norvège	12	78	12	59
United States - Etats-Unis	1,019	981	971	955
Lobsters canned, prepared - Homard préparé en conserve	46	14	54	20
Union of South Africa - Union Sud-Africaine	41	14	51	20
Oysters shelled in cans ('000 quarts) - Huîtres décoquillées, (1000 pintes)	11	43	16	70
Oysters preserved n.o.p. - Huîtres préparées, n.a.e.	187	174	120	114
Japan - Japon	116	97	56	51
United States - Etats-Unis	60	59	53	46
MARINE OILS - Total - HUILES MARINES	498	517
Cod livers oil ('000 gal.) - Huile, foie de morue (1000 gall.)	91	54	136	80
Norway - Norvège	34	14	57	21
Fish oil concentrated, for fortifying - Huile de poisson concentrée	147	103
Japan - Japon	122	61
United States - Etats-Unis	19	39
Other Marine oils ('000 gal.) - Autres huiles marines (1000 gall.)	175	272	215	334
OTHER FISHERY PRODUCTS - Total - AUTRES PRODUITS DE LA PÊCHE	1,398	1,551
Fish offal or refuse - Déchets de poisson	1,433	1,258	50	26
Oyster shell, crushed or not - Ecailles d'huîtres, écrasées ou non	40,650	43,361	260	281
Other products - Autres produits	1,088	1,244

(1) Showing products amounting to \$100,000 or more and countries contributing \$45,000 or more in 1956. If no country is shown, U.S.A. was the sole or main country - except that no country of origin was taken into account for "basket" entries. - Indiquant les produits au montant de \$100,000 ou plus et les pays contribuant \$45,000 ou plus. Omission du pays indiquer que les E.-U. sont le seul ou principal pays - sauf pour postes combinés dont information par pays n'a pas été compilée.

D.B.S. FISHERIES STATISTICS RELEASED IN SEPTEMBER

SUMMARY REVIEW

Ontario Fisheries Reached Record Levels In 1956 The yield of the Ontario fisheries reached a record total of 59,710-000 pounds in 1956, with unprecedented values of \$7,927,000 for fish landed and \$8,920,000 for marketed products. Compared with the preceding year, it was an increase of 31 per cent in quantity landed and of 17 per cent in values. Perch and yellow pickerel were the main species contributing to these increases, while the whitefish and trout fisheries failed to reach previous year's levels.

Fish from Lake Erie normally represents a major share of the landings within the province. The total catch from Lake Erie in 1956 reached 44,683,000 pounds with a landed value of \$5,434,000, against 30,284,000 pounds and \$3,841,400 in the preceding year, an increase of 48 per cent in volume and of 42 per cent in value. Lake Erie waters contributed to 75 per cent of the total Ontario landings, compared with 66 per cent in 1955.

The take of perch increased by 128 per cent to 11,843,000 pounds from 5,181,000 in 1955, with corresponding landed values at \$950,000 and \$661,300. The catch and landed value of yellow pickerel increased by 75 per cent and 47 per cent respectively to 11,672,000 pounds and \$1,908,000 from 6,884,000 pounds and \$1,298,200 in 1955. The landings of blue pickerel were virtually the same in the past two years but the value landed increased to \$1,802,000 in 1956 from \$1,448,500 in the preceding year.

While the Lake Erie fisheries contributed mostly to these recorded increases, it is noteworthy that the Lake Ontario waters as well as northern waters also yielded at better level in the past year than in 1955. The landings in Lake Superior were somewhat less in 1956 than in the previous year, due mainly to a decreased catch of lake trout.
(Advance figures released by D.B.S.)

Catch Smaller In New Brunswick In 1955 The catch of fish and shellfish in the province of New Brunswick declined by 22 per cent in 1955, to 158,359,000 pounds from 221,981,000 in the preceding year. The value of landings and of products also fell - by 8 per cent - to \$6,556,000 and \$20,419,500 respectively from \$7,152,900 and \$22,161,000 in 1954. The decrease was largely accounted for by the failure of the herring fishery in 1955.

The landings of herring (large and small) fell to 55,443,000 pounds and \$646,800 from 106,981,000 pounds and \$1,555,700 in the preceding year. On the other hand, more draggers were operating in 1955 than in the previous year (77 versus 67) and consequently the groundfish catch climbed to 61,358,000 pounds valued at \$1,581,700, against 47,249,000 pounds and \$1,258,100 in 1954. The lobster and oyster fisheries were very satisfactory, the landings being respectively 13 per cent and 46 per cent higher than in the preceding year.

The value of the canned products for the year dropped to \$6,640,600 from \$9,996,200 in 1954, mainly as a result of the small pack of large herring and of sardines. This decline was only partially offset by increased sales of groundfish and shellfish products. The sales of alive lobsters and of fresh or frozen lobster meat were substantially higher than in the previous year, while the pack of the canned meat fell somewhat. The bloater herring production was 7,141,000 pounds against 6,233,000 in 1954.

The value of capital equipment employed in the primary operations advanced to \$9,597,700 from \$8,498,000 in 1954. The number of fishermen was reported at 9,634, versus 9,299 in the preceding year.
(Fisheries Statistics of Canada, New Brunswick 1955)

The Nova Scotia Fisheries Enjoyed Record Year In 1955 The Nova Scotia fisheries reached record levels in 1955 for landings, value landed as well as that of products. Compared with the preceding year, the catch climbed by 7 per cent to 425,902,000 pounds from 396,511,000 and the landed value by 2 per cent to \$23,582,000 from \$23,046,000. The value of products rose by 7 per cent to \$47,092,800 from \$44,078,700 in 1954. Heavy landings of groundfish and of herring mainly contributed to the increase over the 1954 level.

The catch of groundfish rose by 4 per cent to 320,243,000 pounds from 307,573,000 in the previous year. Compared with 1954, the landings of cod fell substantially but this was more than offset by increased catches of haddock and flatfish. The herring fishery yielded at very high level in 1955, reaching 50,201,000 pounds, against 33,093,000 in the preceding year.

As usual, the products marketed were mainly derived from the groundfish species, these contributing to 59 per cent of the total, against 24 per cent from molluscs and crustaceans and 12 per cent from the pelagic or estuarial fish. Significant changes in the products, compared with 1954, were the increases in the frozen filets, the chilled or frozen lobster meat and the pickled fish. The frozen fillet figure (excluding fish blocks) rose to 38,595,000 pounds valued at \$8,298,800 from 33,404,000 pounds and \$7,238,400 in the preceding year. The production of lobster meat was 710,000 pounds valued at \$1,133,300 versus 311,000 and \$525,200 in 1954; as a counterpart the canned lobster (meat) pack declined to 9,347 cases from 19,043.

The value of capital equipment employed in the primary operations was \$24,868,000 in 1955 versus \$24,362,300 in the preceding year. The number of fishermen fell somewhat to 14,221 from 14,864.
(Fisheries Statistics of Canada, Nova Scotia 1955)

LA STATISTIQUE DES PÊCHES PUBLIÉE EN SEPTEMBRE PAR LE BFS

A P E R Ç U

Les pêches de l'Ontario établissent un record en 1956

Le rendement de la pêche en Ontario a atteint le volume record de 59,710,000 livres en 1956 et la valeur sans précédent de \$7,927,000 quant aux débarquements et de \$8,920,000 quant aux produits mis sur le marché. Comparativement à l'année précédente, ces chiffres représentent une augmentation de 31 p. 100 du volume débarqué et de 17 p. 100 de la valeur. La perchaude et le doré commun ont été les principales espèces qui ont figuré à cet accroissement. D'autre part, les pêches de corégone et de truite n'ont pas atteint le niveau de l'année précédente.

D'ordinaire, la pêche du lac Erié représente la plus grande partie des débarquements dans la province. La prise totale dans ce lac a, en 1956, atteint 44,683,000 livres d'une valeur de \$5,434,000 (30,284,000 livres et \$3,841,400 en 1955), augmentation de 48 p. 100 quant au volume et de 42 p. 100 quant à la valeur. Les débarquements du lac Erié ont figuré pour 75 p. 100 du total provincial, en comparaison de 66 p. 100 en 1955.

La prise de la perchaude s'est accrue de 128 p. 100 par rapport à l'année précédente (11,843,000 livres contre 5,181,000) et la valeur est passée de \$661,300 à \$950,000. La prise de doré commun et sa valeur sont montées respectivement de 75 et de 47 p. 100 (11,672,000 livres et \$1,908,000 contre 6,884,000 et \$1,298,200). Les débarquements de sandre ont accusé un volume à peu près semblable à celui de l'année précédente, mais la valeur débarquée est montée de \$1,448,500 à \$1,802,000.

Bien que les pêches du lac Erié aient figuré pour la majeure partie de l'accroissement général, celles du lac Ontario et des eaux du Nord ont donné cependant un meilleur rendement qu'en 1955. Les débarquements du lac Supérieur ont quelque peu diminué par suite, principalement, d'une prise réduite de truite de lac.
(Chiffres provisoires publiés par le BFS)

Réduction, en 1955, des pêches au Nouveau-Brunswick

La prise de poissons et de crustacés et mollusques au Nouveau-Brunswick a, en 1955, diminué de 22 p. 100 sur 1954 (158,359,000 livres contre 221,981,000). La valeur débarquée du poisson et des produits a également baissé pour descendre de 8 p. 100, soit de \$7,152,000 et de \$22,161,000, respectivement, à \$6,556,000 et à \$20,419,000. L'insuccès de la pêche du hareng explique en grande partie cette baisse.

Les débarquements de harengs (gros et petits) ont été réduits à 55,443,000 (106,981,000 en 1954) livres d'une valeur de \$646,800 (\$1,555,700). D'autre part, comme les dragueurs, en 1955, ont été à l'oeuvre en plus grand nombre qu'en 1954 (77 contre 67), la prise de poisson de fond a grimpé à 61,358,000 livres, d'une valeur de \$1,581,700, en comparaison de 47,249,000 livres et de \$1,258,100. Les pêches de homard et d'huîtres ont été fort satisfaisantes et leurs débarquements ont respectivement été supérieurs de 13 et de 46 p. 100 à ceux de l'année précédente.

La valeur des produits en conserve est tombée à \$6,640,600 en 1955, contre \$9,996,200 en 1954, par suite, principalement, d'une mise en conserve réduite de gros hareng et de sardine. Cette réduction n'a été que partiellement contre balancée par l'accroissement des ventes de produits des poissons de fond et de mollusques et crustacés. La vente de homard vivant et de chair fraîche ou congelée de homard s'est considérablement accrue par rapport à l'année précédente, alors que le mise en conserve de la chair a quelque peu diminué. La production de craquelot s'est établie à 7,141,000 livres, contre 6,233,000 en 1954.

La valeur du matériel utilisé dans les opérations premières est montée à \$9,597,700 en 1955, contre \$8,498,000 en 1954. On a signalé que le nombre de pêcheurs est passé de 9,299 à 9,634.

(La statistique des pêches du Canada, Nouveau-Brunswick, 1955)

Les pêches de la Nouvelle-Ecosse ont connu une année record en 1955

En 1955, les pêches de la Nouvelle-Ecosse ont établi des records quant aux débarquements, à la valeur débarquée et à celle des produits. Comparativement à la prise de 1954, celle de 1955 a augmenté de 7 p. 100 (425,902,000 livres contre 396,511,000); dans la même comparaison, la valeur débarquée s'est accrue de 2 p. 100 (\$23,582,000 contre \$23,046,000). La valeur des produits, qui est montée de 7 p. 100, est passée de \$44,078,000 à \$47,092,800. Cette augmentation sur 1954 provient surtout de lourds débarquements de poisson de fond et de hareng.

La prise de poisson de fond s'est accrue de 4 p. 100 sur 1954 (320,243,000 livres contre 307,573,000). Dans la même comparaison, les débarquements de morue ont fortement décliné, mais ce recul a été plus que compensé par l'avance enregistrée par les prises d'églefin et de pleuronectes. La pêche de hareng, très abondante en 1955, a atteint 50,201,000 livres, contre 33,093,000 l'année précédente.

Comme d'habitude, les produits mis sur le marché provenaient principalement des espèces de fond, qui ont figuré pour 59 p. 100 de la valeur totale, comparativement à 24 p. 100 pour les mollusques et crustacés et à 12 p. 100 pour les poissons pélagiques ou d'estuaire. Relativement aux produits, on a noté des changements marqués vis-à-vis 1954 pour les filets congelés, la chair de homard réfrigérée ou congelée et le poisson saumuré. Les filets congelés (à l'exclusion des blocs) se sont élevés à 38,595,000 livres (\$8,298,800), au regard de 33,404,000 (\$7,238,400) en 1954. La production de chair de homard s'est établie à 710,000 livres d'une valeur de \$1,133,300, contre 311,000 et \$525,200; par contre, la chair de homard en conserve a été réduite de 19,043 à 9,347 caisses.

La valeur du matériel utilisé dans les opérations premières s'est chiffrée par \$24,868,000 en 1955, contre \$24,362,300 en 1954. Le nombre des pêcheurs a quelque peu diminué (14,221 contre 14,864).

THE EAST COAST GROUND FISH CATCH AT HIGH LEVEL IN OCTOBER

The total landings of sea fish and shellfish, in October, were 129,789,000 pounds valued at \$4,553,000. Compared with 1956, it was an increase of 16 per cent in quantity but a decline of 15 per cent in value. The catch and its value were up on the Atlantic Coast as a result of a heavy yield of the groundfish fisheries. A bumper catch of herring materialized in British Columbia but the salmon catch fell substantially below previous year's level, due in part to the strike of the net fishermen during a short period.

For the period January-October, the total catch for the sea fisheries declined by 8 per cent to 1,677,547,000 pounds from 1,828,943,000 and the value fell by 12 per cent (\$73,476,000 versus \$83,503,000). However, it is noteworthy that fishing results were most gratifying in the preceding year, reaching a record level in total for catch and value landed.

British Columbia - The catch of fish in British Columbia for October climbed by 84 per cent to 28,652,000 pounds from 15,579,000 a year ago but the value, at \$1,416,000, was 39 per cent less than last year. Heavy landings of herring contributed almost entirely to the increase in volume, while the small take of salmon brought the value down drastically. During the first week of the month, conservation closures were in effect in most of the major fishing areas for salmon, while between October 6 and October 14, net fishermen were on strike pending settlement of agreement in fall chum prices. The catch of salmon declined to 7,692,000 pounds valued at \$911,000 from 12,594,000 pounds and \$2,077,000 in October 1956.

The January-October landings dropped by 20 per cent to 447,478,000 pounds from 557,152,000 in 1956 and the value fell by 18 per cent to \$27,808,000 from \$34,075,000, reflecting a loss of income from almost all the major fishing operations. Compared with 1956, the price of halibut and of some salmon species declined significantly.

Atlantic Coast - The landings of fish and shellfish for the Atlantic Coast were up by 5 per cent to 101,137,000 pounds in October from 96,560,000 a year ago; the value increased by 3 per cent to \$3,137,000 from \$3,034,000. A heavy yield of the groundfish fisheries mainly cod and flounders largely accounted for the increase. The catch of cod was 26,780,000 pounds in Newfoundland, against 17,896,000 in October of the preceding year and the take of flounders was particularly gratifying in Nova Scotia during the month. Lower landings of hake and redfish, compared with 1956, only partially off-set these gains. There was a heavy run of herring in New Brunswick reaching 13,799,000 pounds against 7,746,000 in October 1956.

Cumulative figures for the period January-October show a decline of 3 per cent in quantity (1,230,069,000 pounds versus 1,271,791,000) and of 8 per cent in value (\$45,668,000, against \$49,428,000). There was a low yield of the groundfish fisheries in the summer months and the output of packaged frozen fillets declined substantially. Lobster fishing was not as successful as in 1956 and the prices were substantially below those of the previous year in the early months of the year.

Stocks of Fish and Exports - The total reported stocks of frozen fish were reported at 73,801,000 pounds at the end of October, a decline of 17 per cent compared with the same month of 1956. Bait, groundfish fillets, Pacific salmon and halibut were the main products contributing to the decrease. The stocks of groundfish fillets (including blocks) declined by 20 per cent to 20,200,000 pounds from 25,200,000 in 1956. Most significant was the drop in the holdings of packaged cod fillets.

The exports of fish and fishery products for the first nine months of the year were valued at \$97,951,000, and this was virtually the same than a year ago. Export sales were down on herring oil, fish meal and canned pink salmon but this was off-set by increased sales of other products, mainly fresh fish (halibut, salmon, etc.) and dried-salted groundfish.

HAUT NIVEAU DE LA PRISE DE POISSON DE FOND SUR LA CÔTE DE L'EST

Les débarquements de poisson de mer et de mollusques et crustacés, en octobre, ont atteint 129,789,000 livres d'une valeur de \$4,553,000. Ces chiffres, comparés à ceux de 1956, représentent une augmentation de 16 p. 100 quant à la quantité, mais une diminution de 15 p. 100 quant à la valeur. La prise et sa valeur ont été plus élevées sur la côte de l'Atlantique par suite du fort rendement des pêches de poisson de fond. Une magnifique prise de hareng a été réalisée en Colombie-Britannique mais, conséquence partielle de la courte grève des pêcheurs au filet, la prise de saumon a baissé fort au-dessous du niveau de celle de l'année précédente.

Au cours de la période janvier-octobre, la prise totale des pêches maritimes a diminué de 8 p. 100 (1,677,547,000 livres contre 1,828,943,000) et la valeur, de 12 p. 100 (\$73,476,000 contre \$83,503,000). Cependant, il est à remarquer que la pêche a été satisfaisante au cours de l'année précédente puisqu'elle a atteint un sommet et quant au volume et quant à la valeur.

Colombie-Britannique - Dans cette province, la prise de poisson s'est accrue de 84 p. 100 en octobre, soit 28,652,000 livres contre 15,579,000 un an plus tôt, mais la valeur (\$1,416,000) a été inférieure de 39 p. 100 à celle d'une année auparavant. De lourds débarquements de hareng ont contribué presque entièrement à l'augmentation en volume alors que la petite prise de saumon a baissé drastiquement la valeur. Au cours de la première semaine du mois, la pêche au saumon, pour fins de conservation, a été interdite dans la plupart des principales régions de pêche, alors que, entre le 6 et le 14 octobre, les pêcheurs au filet étaient en grève, attendant le règlement du différend au sujet des prix d'automne du kéta. La prise de saumon a diminué à 7,692,000 livres d'une valeur de \$911,000 contre 12,594,000 livres et \$2,077,000 en octobre 1956.

Les débarquements de janvier-octobre ont diminué de 20 p. 100 (447,478,000 livres contre 557,152,000) et leur valeur, de 18 p. 100 (\$27,808,000 contre \$34,075,000), par suite d'une baisse presque générale dans les recettes des principales opérations de pêche. Comparativement à 1956, le prix du flétan et de quelques espèces de saumon a fortement baissé.

Côte de l'Atlantique - Les débarquements de poisson et de mollusques et crustacés sur la côte atlantique ont augmenté de 5 p. 100 en octobre (101,137,000 livres contre 96,560,000 un an plus tôt) et la valeur, de 3 p. 100 (\$3,137,000 contre \$3,034,000). L'abondance des pêches de poisson de fond, principalement de la morue et du carrelet, a largement contribué à l'augmentation. La prise de morue s'est établie à 26,780,000 livres à Terre-Neuve, en comparaison de 17,896,000 en octobre 1956, et la prise de carrelet a été particulièrement bonne en Nouvelle-Ecosse. Des débarquements réduits de morue barbue et de perche rose, au regard de ceux de 1956, n'ont que partiellement contrebalancé ces gains. La prise de hareng au Nouveau-Brunswick a été abondante et s'est établie à 13,799,000 livres contre 7,746,000 en octobre 1956.

Les chiffres pour la période janvier-octobre indiquent une diminution de 3 p. 100 quant à la quantité (1,230,069,000 livres contre 1,271,791,000) et de 8 p. 100 quant à la valeur (\$45,668,000 contre \$49,428,000). Les pêches de poisson de fond ont enregistré un faible rendement au cours des mois d'été, et la production de filets congelés et emballés a fortement décliné. La pêche au homard n'a pas été aussi fructueuse qu'en 1956 et les prix, au cours des premiers mois de l'année, ont été substantiellement plus bas que ceux d'une année auparavant.

Les stocks et exportations - Les stocks de poisson congelé s'établissaient à 73,801,000 livres à la fin d'octobre, pour une diminution de 17 p. 100 sur les chiffres correspondants de 1956. La boîte, les filets de poisson de fond, le saumon et le flétan du Pacifique ont été les principaux articles qui ont figuré à la baisse. Les stocks de filets de poisson de fond (y compris les blocs) ont diminué de 20 p. 100 (20,200,000 livres contre 25,200,000). La diminution la plus importante a été celle des stocks de filets de morue emballée.

Au cours des neuf premiers mois de l'année, les exportations de poisson et de produits de la pêche ont été évaluées à \$97,951,000 en 1957, soit à peu près le même montant qu'en 1956. Les ventes à l'étranger ont baissé pour l'huile de hareng, la farine de poisson, et le saumon rose en conserve, mais cette diminution a été plus que compensée par l'augmentation quant aux autres produits, principalement le poisson frais (flétan, saumon, etc.) et le poisson de fond salé à sec.

D.B.S. FISHERIES STATISTICS RELEASED IN OCTOBERSUMMARY REVIEW

Prince Edward Island Fisheries Enjoyed Record Year In 1956 The value of fishery products in Prince Edward Island increased by 36 per cent in 1956 to a record value of \$5,245,800 from the 1955's \$3,840,800. The total catch and its landed value, at 42,200,000 pounds and \$3,948,700, also reached unprecedented levels, being respectively 17 per cent and 22 per cent over the 1955 figures. Heavy landings of lobsters and of groundfish as well as firm prices largely accounted for these results.

The lobster catch climbed by 12 per cent to 9,701,000 pounds from 8,329,000 in 1955 and its value to fishermen by 17 per cent to \$2,725,800 from \$2,324,100. In the late years the groundfish catch has grown significantly through the introduction of the 60 foot draggers. The groundfish landings in 1956 reached 21,333,000 pounds valued at \$583,600, against 15,164,000 pounds and \$405,600 in the preceding year. The crop of oysters was also heavy, at 2,507,000 pounds with a value of \$203,500 versus 2,234,000 pounds and \$139,200 in 1955.

As usual the lobster accounted for the major part of value of products, contributing \$3,139,700 or 60 per cent of the total. The pack of canned lobster meat increased by 45 per cent to 25,509 cases (48 lb. basis) from 17,577 in the preceding year, its value reaching \$2,151,900 versus \$1,032,500 in 1955. The value of groundfish products climbed by 13 per cent to \$1,107,700 from \$854,700 in the preceding year.

The value of capital equipment employed in primary operations of the province's fisheries was \$3,352,900 versus \$3,293,600 in the preceding year. The number of fishermen was 2,967 against 2,863 in 1955.

(Advance figures released by D.B.S.)

Favourable Prices for the British Columbia Fisheries in 1956 The 1956 catch of fish in British Columbia increased by 36 per cent, compared with the preceding year, to a record total of 677,225,000 pounds. The landed value climbed by 30 per cent to \$36,054,600 from \$27,710,600 and the value of products by 13 per cent to \$67,725,100 from \$60,032,300 in 1955. Heavy landings of herring and of halibut as well as firm prices for the main fishery products mainly accounted for these results.

The catch of herring reached 491,396,000 pounds with a landed value of \$7,077,000, both figures being an all-time record for this fishery. The landings of halibut increased to 23,315,000 pounds and \$5,067,000 from 19,679,000 pounds and \$2,555,000 in the preceding year, showing increases of 18 per cent and 98 per cent respectively. The salmon catch declined by 13 per cent, 113,530,000 pounds from 131,008,000 pounds in the preceding year, and was in fact the lowest since 1944. It was an off-year in the cycle for the pink and sockeye species and for a second consecutive year the chum fishery procured rather disappointing results. However, the scarcity of salmon brought the prices up and the landed value, at \$21,356,000, was 16 per cent greater than in 1955. Both salmon and halibut fetched very high prices in the past year.

The value of products was the fourth highest on record. In spite of a low salmon catch, the value of products from salmon increased by 4 per cent to \$44,430,700 from \$42,625,500 in 1955. That of canned salmon declined somewhat, because of the small pack, but this was more than offset by increased sales of frozen products. The herring products and by-products reached \$10,660,500, against \$7,635,600 in the preceding year, while the halibut increased by 66 per cent to \$6,513,000 from \$3,924,300 in 1955.

The value of capital equipment employed in the primary operations was \$50,775,000 compared with \$50,464,000 in the preceding year. The number of fishermen was reported at 11,851 against 12,836 in 1955.

(Advance figures released by D.B.S.)

Fisheries Of Ontario, Prairie Provinces And Northwest Territories At High Level In 1955 The fisheries of Ontario, the Prairie Provinces and the Northwest Territories yielded 107,280,000 pounds in 1955, with a landed value of \$12,452,000 and a marketed value of \$17,963,900. Compared with the preceding year, the catch rose by 5 per cent (from 102,435,000 pounds) and the landed value was up by 2.5 per cent (from \$12,144,200); however, the marketed value was virtually unchanged from one year to the other. The increase in landings was largely accounted for by the blue and yellow pickerel species. As a counterpart, the whitefish catch fell significantly below the 1954 level.

The catch of blue pickerel in Lake Erie increased to 12,037,000 pounds with a landed value of \$1,444,500, from 8,151,000 pounds and \$1,222,600 in 1954. The yellow pickerel landings were also heavy from Lake Erie and from the most important lakes in the province of Manitoba - Winnipegosis, Winnipeg and Manitoba. The total landings of yellow pickerel climbed to 19,586,000 pounds with a landed value of \$3,059,300 from 16,607,000 pounds and \$2,640,200 in 1954.

The relative importance of the Great Slave Lake fisheries in the production of the most valuable freshwater species, whitefish and lake trout, was apparent in 1955. Increased landings of lake trout from the Great Slave Lake, compared with 1954, compensated for the loss in Lakes Superior and Athabaska. Lake trout landings in the Great Slave Lake accounted for almost half of the 6,010,000 pounds total in 1955 (5,945,000 in the preceding year). The catch of whitefish in the Great Slave Lake increased to 4,600,000 pounds, from 4,019,000 in 1954. However, this increase was more than offset by the drop of almost 2.5 million pounds from the Ontario waters. The total catch of whitefish therefore fell by 11 per cent to 21,929,000 pounds from 24,536,000 in 1954 and its value landed declined by 16 per cent to \$3,712,700 from \$4,417,300.

The weight of the catch was down in Ontario to 45,634,000 pounds from 47,680,000 in 1954, in Saskatchewan to 10,152,000 from 10,524,000 and in Alberta to 8,731,000 from 8,765,000. The weight was up in Manitoba to 34,936,000 from 28,445,000 and in the Northwest Territories to 7,827,000 from 7,021,000. The value of products dropped in Ontario to \$7,631,700 from \$7,889,000 a year earlier, in Saskatchewan to \$1,616,900 from \$1,644,400 and in the Northwest Territories to \$1,529,300 from \$2,040,200. The value rose in Manitoba to \$6,043,500 from \$5,278,700 and in Alberta to \$1,144,000 from \$1,141,000.

The total number of fishermen was reported at 16,142 versus 16,501 in 1954. However these figures refer to licences issued and the duplications resulting from the count of licences are not removed in all provinces. The capital employed in the primary operations was reported at \$14,555,700, against \$15,380,000 in the preceding year.

(Fisheries Statistics of Canada - Ontario, Prairie Provinces and Northwest Territories, 1955)

A P E R Ç U

Les pêches de l'Île-du-Prince-Edouard ont connu une année record en 1956

La valeur des produits de la pêche en Île-du-Prince-Edouard s'est accrue de 36 p. 100 en 1956 pour s'établir à \$5,245,800, comparativement à \$3,840,800 en 1955. La prise et la valeur débarquée (42,200,000 livres et \$3,948,700) ont également enregistré des chiffres inégaux et l'ont emporté respectivement de 17 et 22 p. 100 sur les données correspondantes de 1955. Les principaux facteurs de cette situation ont été la fermeté des prix et les lourds débarquements de homard et de poissons de fond.

La prise de homard a grimpé de 12 p. 100 (9,701,000 livres en 1956 contre 8,329,000 en 1955) et sa valeur d'origine, de 17 p. 100 (\$2,725,800 contre \$2,324,100). Ces dernières années, la prise de poisson de fond a fort augmenté par suite de l'usage de dragueurs de 60 pieds. Les débarquements de poisson de fond, en 1956, ont atteint 21,333,000 livres d'une valeur de \$583,600, en comparaison de 15,164,000 livres et de \$405,600 l'année précédente. La ceuillette d'huîtres a également été lourde soit 2,507,000 (2,234,000) livres pour une valeur de \$203,500 (\$139,200).

Le homard, comme d'habitude, a figuré pour la majeure partie de la valeur des produits, soit \$3,139,700 ou 60 p. 100 du total. La mise en conserve de chair de homard s'est accrue de 45 p. 100 et s'est chiffrée par 25,509 caisses (unité de 48 livres), contre 17,577 l'année précédente, pendant que sa valeur passait de \$1,032,500 à \$2,151,900. La valeur des produits de poisson de fond a grimpé de 13 p. 100 (\$1,107,700 contre \$854,700).

La valeur de l'outillage utilisé dans les opérations premières de la pêche en Île-du-Prince-Edouard a atteint \$3,352,900 contre \$3,293,600 l'année précédente. Le nombre des pêcheurs s'est établi à 2,967 contre 2,863.
(Chiffres provisoires publiés par le BFS)

En Colombie-Britannique, la valeur des pêches s'accroît en 1956

En Colombie-Britannique, la prise de poissons en 1956 a augmenté de 36 p. 100 sur celle de 1955 pour atteindre le sommet de 677,225,000 livres. Dans la même comparaison, la valeur débarquée a grimpé de 30 p. 100 (\$36,054,600 contre \$27,710,600) et la valeur des produits, de 13 p. 100 (\$67,725,100 contre \$60,032,300). Cette situation s'explique en grande partie par la fermeté des prix pour les principaux produits de la pêche, ainsi que par les lourds débarquements de hareng et de flétan.

La prise de hareng a atteint 491,396,000 livres d'une valeur débarquée de \$7,077,000; ces deux chiffres représentent un record pour cette espèce. Les débarquements de flétan se sont élevés à 23,315,000 livres d'une valeur de \$5,067,000, comparativement à 19,679,000 livres et à \$2,555,000 l'année précédente; c'était là des augmentations respectives de 18 et de 98 p. 100. La prise de saumon est tombée de 13 p. 100 (113,530,000 livres contre 131,008,000) pour descendre à son plus bas niveau depuis 1944. Mil neuf cent cinquante-six a été la mauvaise année du cycle pour la pêche des saumons rose et rouge et, pour la seconde année, plutôt décevante pour la pêche du keta. Néanmoins, la rareté du saumon ayant fait monter les prix, la valeur débarquée (\$21,356,000) a été supérieure de 16 p. 100 à celle de 1955. Le saumon et le flétan se sont tous deux vendus cher l'an dernier.

La valeur des produits a été la quatrième en importance à être enregistrée. Malgré la prise peu élevée du saumon, la valeur des produits de cette espèce s'est accrue de 4 p. 100 sur 1955 (\$44,430,700 contre \$42,625,500). Si la valeur des conserves de saumon a quelque peu diminué par suite de la quantité réduite mise en conserve, cependant, l'accroissement des ventes de produits congelés a plus que compensé cette réduction. Les produits et sous-produits du hareng ont atteint \$10,660,500, au regard de \$7,635,600 l'année précédente, alors que ceux de flétan ont accusé une valeur accrue de 66 p. 100 (\$6,513,000 contre \$3,924,300).

La valeur de l'outillage utilisé dans les opérations premières s'est chiffrée par \$50,775,000, comparativement à \$50,464,000 en 1955. Dans la même comparaison, le nombre des pêcheurs s'est établi à 11,851, contre 12,836.
(Chiffres provisoires publiés par le BFS)

L'abondance des pêches de l'Ontario, des Prairies et des Territoires du Nord-Ouest en 1955

Les pêches de l'Ontario, des Prairies et des Territoires du Nord-Ouest ont donné 107,280,000 livres en 1955 pour une valeur débarquée de \$12,452,000 et une valeur marchande de \$17,963,900. Comparativement à l'année précédente, la prise s'est accrue de 5 p. 100 (102,435,000 livres en 1955) et la valeur débarquée, de 2.5 p. 100 (\$12,144,200), alors que la valeur marchande était quasi stationnaire. La majeure partie de l'augmentation des débarquements est due à la pêche de la sandre et du doré jaune. Par contre, la prise du corégone est tombée fort au-dessous de celle de 1954.

La prise de la sandre dans le lac Érié est montée à 12,037,000 livres d'une valeur débarquée de \$1,444,500, en comparaison de 8,151,000 livres et de \$1,222,600 en 1954. Le lac Érié et les principaux lacs du Manitoba (Winnipegosis, Winnipeg et Manitoba) ont compté des débarquements également plus abondants de doré jaune. L'ensemble des débarquements de cette dernière espèce a grimpé à 19,586,000 livres d'une valeur débarquée de \$3,059,300, au regard de 16,507,000 livres et de \$2,640,200 en 1954.

L'année 1955 a prouvé avec évidence que les pêches du Grand lac des Esclaves détenaient une grande importance quant à la production des espèces d'eau douce les plus précieuses, du corégone et de la truite de lac. Les débarquements accrus, au regard de 1954, de la truite de lac au Grand lac des Esclaves ont compensé pour la réduction de cette pêche dans les lacs Supérieur et Athabaska. Les débarquements de truite de lac au Grand lac des Esclaves a figuré pour près de la moitié des 6,010,000 livres débarquées en 1955 (5,945,000 en 1954). Dans la même comparaison, la prise du corégone dans le Grand lac des Esclaves est passée de 4,019,000 à 4,600,000 livres. Toutefois, cette augmentation a été plus que contre-balancée par la diminution de 2,500,000 livres accusée par la pêche des eaux ontariennes. En conséquence, la prise totale du corégone est tombée de 11 p. 100 (21,929,000 livres en 1955 contre 24,536,000 en 1954) et sa valeur débarquée, de 16 p. 100 (\$3,712,700 contre \$4,417,000).

Comparativement à 1954, le poids de la prise en 1955 a baissé en Ontario (45,634,000 livres contre 47,680,000), en Saskatchewan (10,152,000 contre 10,524,000) et en Alberta (8,731,000 contre 8,765,000), mais a monté au Manitoba (34,936,000 contre 28,445,000) et dans les Territoires du Nord-Ouest (7,827,000 contre 7,021,000). Quant à la valeur des produits, elle est descendue en Ontario (\$7,631,700 contre \$7,889,000), en Saskatchewan (\$1,616,900 contre \$1,644,400) et dans les Territoires du Nord-Ouest (\$1,529,300 contre \$2,040,200), mais s'est élevée au Manitoba (\$6,043,500 contre \$5,278,700) et en Alberta (\$1,144,000 contre \$1,141,000).

Le nombre de pêcheurs a été de 16,142, au regard de 16,501 en 1954. Cependant, ces chiffres étant issus du nombre des permis délivrés, le double emploi dans le calcul n'est pas éliminé pour toutes les provinces. L'outillage utilisé dans les opérations premières valait \$14,555,700, par rapport à \$15,380,000 l'année précédente.

HEAVY LANDINGS IN BRITISH COLUMBIA FOR NOVEMBER

The total landings of sea fish and shellfish in November were 70,155,000 pounds valued at \$2,397,000. Compared with 1956, it was an increase of 25 per cent in quantity and of 14 per cent in value. Fishing results were better than last year in British Columbia and in Nova Scotia for both quantity and value landed. British Columbia chum salmon and herring were landed in large quantities and the cod catch was heavy on the Atlantic Coast. However, the Atlantic herring and mackerel runs were poor in the month and lobster failed to fetch as good prices as in November 1956.

For the period January-November the total catch for the sea fisheries fell by 7 per cent to 1,753,809,000 pounds from 1,884,932,000 in the previous year. The value landed was down by 11 per cent to \$76,065,000 from \$85,582,000. The decline was most significant in British Columbia, but applied also to each of the East Coast provinces - at least in terms of value landed.

British Columbia - The catch of fish in British Columbia, for November, climbed to 19,684,000 pounds from 2,972,000 in 1956. The landed value was up by 164 per cent to \$630,000 from \$239,000. Higher returns for chums, heavy herring landings and a very satisfactory yield of the groundfish fisheries accounted for most of the increase.

While the herring fishery was conducted on a limited basis, with only the Prince Rupert Cooperative and the dry salt operator boats actively engaged, the catch was of course higher than a year ago when the entire fleet was on strike until December 2, pending price negotiation. The salmon catch was up to 1,852,000 pounds valued at \$241,000 against 667,000 pounds and \$125,000 in November 1956. Chum landings for the month climbed to 1,724,000 pounds valued at \$215,000 from 540,000 pounds and \$86,000 a year ago. The main increase in catch occurred in District 1 where fishermen caught 94,000 chums versus 16,500 in November 1956. The gray cod, lingcod and sole landings were also substantially above those of a year ago.

Atlantic Coast - The landings and value of fish and shellfish for the Atlantic Coast in November were down by 5 per cent to 50,471,000 pounds and \$1,767,000 from 53,016,000 pounds and \$1,862,600 a year ago. The decline was largely due to smaller runs of herring and of mackerel as well as to reduced prices paid for lobsters, compared with the same month of 1956.

The mackerel fishery was a complete failure in Newfoundland, the catch being 15,000 pounds, against 321,400 for the same month last year. The mackerel run was also poor off the west coast of Cape Breton, Nova Scotia. The lobster catch from the Bay of Fundy averaged 31.4 cents per pound in November against 46.7 cents in the same month of 1956. On the other hand the groundfish fishery yielded one million pounds more this November than last, due to heavy cod landings in Nova Scotia.

Stocks of Fish and Exports - The total reported stocks of frozen fish were 63,727,000 pounds at the end of November, showing a decline of 23 per cent compared with 1956. Packaged cod fillets, Pacific salmon and halibut were the main products contributing to the decrease. The production of packaged cod fillets as well as that of frozen salmon products were substantially curtailed, compared with the year 1956, and this is reflected in the stock figures. The stocks of wet-salted groundfish were reported lower than those of a year ago, while those of the dried products were somewhat higher; the stocks of pickled herring were more than twice those of 1956 and a moderate increase materialised in the holdings of bloaters.

The exports of fish and fishery products for the period January-October declined by 2 per cent to \$111,898,000 from \$113,826,000 in 1956. The export sales of the groundfish fillets and blocks were up somewhat and those of dried salted fish increased significantly; however, these gains and others were more than offset by reduced sales of canned sockeye and pink salmon as well as of fish meal and oils.

DE LOURDS DEBARQUEMENTS EN COLOMBIE-BRITANNIQUE, EN NOVEMBRE

En novembre, les débarquements de poissons de mer et de mollusques et crustacés ont atteint 70,155,000 livres pour une valeur de \$2,397,000. Comparativement au même mois de 1956, ces chiffres représentaient une hausse de 25 p. 100 quant au volume et de 14 p. 100 quant à la valeur. A ces deux points de vue, le rendement de la pêche a été plus fructueux en Colombie-Britannique et en Nouvelle-Ecosse. Dans la première de ces deux provinces, les débarquements de saumon keta et de hareng ont été plus abondants et, sur la côte de l'Atlantique, la prise de morue a été lourde. Toutefois, la migration du hareng et du maquereau de l'Atlantique a été pauvre au cours du mois et le homard ne s'est pas vendu aussi cher qu'en novembre 1956.

En ce qui concerne la période janvier-novembre, la prise maritime a été réduite de 7 p. 100 sur un an plus tôt (1,753,809,000 livres contre 1,884,932,000) et la valeur débarquée, de 11 p. 100 (\$76,065,000 contre \$85,582,000). La baisse a été encore plus marquée en Colombie-Britannique, mais c'était également le cas de chacune des provinces orientales, du moins dans le cas de la valeur débarquée.

Colombie-Britannique Dans cette province, la prise a grimpé à 19,684,000 livres en novembre, en comparaison de 2,972,000 un an auparavant. Quant à la valeur débarquée, la hausse s'est établie à 164 p. 100 (\$630,000 en 1957 contre \$239,000 en 1956). La majeure partie de cette hausse est due à des recettes plus élevées relativement au saumon keta, à de lourds débarquements de hareng et à un rendement très satisfaisant de la pêche au poisson de fond.

Bien que la pêche au hareng se soit faite d'une façon plutôt limitée, - vu que seulement la Coopérative de Prince-Rupert et les bateaux s'occupant du salage à sec s'y soient adonnés, - néanmoins, la prise a été plus forte qu'une année auparavant; à cette période-là, toute la flotte des pêcheurs avait été en grève jusqu'au 2 décembre, alors qu'on négociait relativement aux prix. La prise de saumon est montée à 1,852,000 livres (\$241,000), comparativement à 667,000 (\$125,000) en novembre 1956. Durant le mois, les débarquements de saumon keta se sont élevés à 1,724,000 livres (\$215,000), contre 540,000 (\$86,000) un an plus tôt. Le district I a enregistré la plus forte augmentation de la prise, quand les pêcheurs ont pris 94,000 saumons keta, au regard de 16,500 en novembre 1956.

Les débarquements de morue du Pacifique, de morue-lingue et de sole ont, également, été fortement supérieurs à ceux d'une année auparavant.

Côte de l'Atlantique En novembre, le volume et la valeur des débarquements de poisson et de mollusques et crustacés sur la côte de l'Atlantique ont tous deux diminué de 5 p. 100 sur un an plus tôt (50,471,000 livres et \$1,767,000 en 1957 contre 53,016,000 et \$1,862,600 en 1956). Ce recul est dû en grande partie à une réduction, par rapport au même mois de 1956, des migrations de hareng et de maquereau et des prix du homard.

La pêche au maquereau à Terre-Neuve a été un véritable fiasco; la prise s'y est établie à 15,000 livres en comparaison de 321,000 le même mois, l'an dernier. Au large de la côte occidentale du Cap-Breton, en Nouvelle-Ecosse, la remonte du maquereau a également été pauvre. Dans la baie de Fundy, la ceuillette du homard a été évaluée à une moyenne de 31.4c. la livre en novembre, contre 46.7c. le même mois de 1956. D'autre part, la prise de poisson de fond a donné un million de livres de plus qu'en novembre 1956, grâce à de lourds débarquements de morue en Nouvelle-Ecosse.

Les stocks et exportations de poisson Fin novembre, les stocks de poisson congelé qui ont été signalés se chiffraient par 63,727,000 livres pour une diminution de 23 p. 100 sur un an plus tôt. Les filets de morue emballés, le saumon et le flétan du Pacifique ont été les principaux produits qui ont figuré à la réduction. La production de filets de morue emballés et de produits de saumon congelés a grandement été réduite par rapport à 1956; cette situation s'est reflétée dans les chiffres relatifs aux stocks. Les stocks de poisson de fond vert-salé enregistraient un recul comparativement à 1956, tandis que les produits séchés étaient plus volumineux qu'un an plus tôt; les stocks de hareng saumurés étaient plus que doublés et une légère augmentation était signalée pour le hareng bouffi.

Les exportations de poisson et des produits de la pêche, pour la période janvier - octobre, ont été réduites de 2 p. cent sur un an plus tôt (\$111,898,000 contre \$113,826,000). Les ventes à l'exportation de filets et blocs de poissons de fond ont augmenté quelque peu et celles de produits salés séchés se sont beaucoup accrues; toutefois ces augmentations ainsi que d'autres ont été plus que contrebalancées par le recul des ventes de saumon sockeye et rose en conserve comme de celles de la farine et de l'huile de poisson.

D.B.S. ANNUAL FISHERIES STATISTICS RECENTLY RELEASEDSUMMARY REVIEWValue of Fishery Products at
Record in New Brunswick, 1956

The value of fishery products in the province of New Brunswick reached the unprecedented figure of \$22,830,700 in 1956, showing an increase of 12 per cent over the 1955 figure of \$20,419,500. The catch of fish climbed by 16 per cent to 194,283,000 pounds from 167,438,000 in 1955 and the landed value was up by 21 per cent to \$8,146,300 from \$6,753,300. Heavy landings of groundfish and of herring in the past year largely accounted for these results.

The catch of groundfish was up by 26 per cent to 77,398,000 pounds from 61,358,000 in 1955 and its value to fishermen climbed by 14 per cent to \$1,806,700 from \$1,581,700. A heavy run of large cod materialized in the Gulf of St. Lawrence in 1956 and this largely contributed to increased landings of groundfish. The take of hake and redfish was also substantially above that of 1955. There was a bumper catch of 71,443,000 pounds of herring valued to fishermen at \$1,037,100, against 55,443,000 pounds and \$646,800 in the preceding year, the increase applying mostly to small herring or "sardines".

The output of frozen packaged fillets was up to 8,860,000 pounds valued at \$1,553,600 from 4,873,000 pounds and \$1,170,800 in the preceding year. The pack of canned fish products increased to 909,471 cases and \$7,366,200 from 533,070 cases and \$4,035,800 in the preceding year. The pack of canned sardines, at 832,278 cases (20 lbs.) valued at \$5,410,500, was nearly twice that of the preceding year.

The capital equipment employed in the primary operations was reported at \$9,304,100 against \$9,642,800 in 1955 and the total number of fishermen was 9,785 versus 10,066.

Heavy Landings Of
Fish in Alberta, 1956

The catch of fish in Alberta climbed by 10 per cent in 1956 to 9,641,000 pounds from 8,731,000 in the preceding year. The value landed was up by 15 per cent to \$790,200 from \$687,500 and the value marketed by 14 per cent to \$1,305,900 from \$1,143,500. The increase was largely accounted for by a heavier yield of the whitefish fishery in 1956 than in the previous year, a decline in the yellow pickerel landings only partially off-setting this gain.

Fishing was particularly successful in Lake Wabamun. The whitefish catch in this lake reached 1,056,000 pounds with values at \$113,920 as landed and at \$233,000 as marketed, compared with 198,500 pounds in 1955 with values respectively at \$29,770 and \$63,500. There was also a substantial increase in the catch from Lake La Biche. As a counterpart the landings declined in the Lesser Slave Lake which is the most important in the fisheries of the province. Most significant was the drop in the yellow pickerel landings from the Lesser Slave Lake to 117,600 pounds valued at \$9,415 in 1956, against 576,500 pounds and \$53,206 in the previous year.

The value of equipment employed in primary operations was reported at \$470,600 against \$656,200 in 1955. The number of fishermen declined to 4,277 from 5,247.

Smaller catch in the
Northwest Territories, 1956

The catch of fish in the Northwest Territories decreased by 11 per cent to 6,939,000 pounds from 7,827,000 in 1955, both the trout and whitefish landings showing a decline. The value of products was down by 3 per cent to \$1,482,900 from \$1,529,300 in the preceding year. On the other hand, the landed value was up by six per cent to \$787,400 from \$742,000.

The capital equipment employed in the primary operations was reported at \$754,500 against \$789,900 in the preceding year. The number of fishermen declined to 575 from 716 in the preceding year.

Heavy Yield of the Quebec
Fisheries in 1955

The value of the fishery products in Quebec climbed by 33 per cent in 1955 to \$6,675,100 from \$5,002,100 in the preceding year and was the highest since 1946. The catch of fish, at 129,192,000 pounds, was a record to date and 40 per cent more than in the preceding year. The landed value increased by 18 per cent to \$3,452,600 from \$2,930,900 in 1954. The increase took place in the sea fisheries and was due mostly to heavy landings of groundfish.

The take of groundfish climbed to 50,682,000 pounds valued to fishermen at \$1,282,500 from 38,856,000 pounds and \$873,500 in the preceding year. This was due in great part to the growth of the modern fishing fleet of draggers and long liners. These vessels also contributed to substantial landings of plaice and redfish. The herring fishery also yielded at very high level at the Magdalen Islands in 1955.

The expansion of the filleting plants in 1955 contributed to a substantial output of packaged fillets and blocks. The total production of groundfish fillets was up to 4,644,000 pounds valued at \$779,100 from 1,824,000 pounds and \$216,800 in the preceding year. The increase applied to both packaged fillets and blocks. The salted fish production was also substantially higher in 1955 than in the preceding year.

For the sea and inland fisheries, the capital investment in the primary operations was reported at \$4,247,000, against \$3,987,000 in the preceding year and the total number of fishermen was 6,383 versus 6,272.

LA STATISTIQUE ANNUELLE DES PECHES PUBLIEE RECEMMENT PAR LE BFS

A P E R C UValeur sans précédent des produits de la pêche au Nouveau-Brunswick en 1956

La valeur des produits de la pêche au Nouveau-Brunswick a atteint le chiffre sans précédent de \$22,830,700 en 1956 pour une augmentation de 12 p. 100 sur les \$20,419,500 de 1955. La prise a augmenté de 16 p. 100, soit de 167,438,000 livres en 1955 à 194,283,000 en 1956, et la valeur des débarquements s'est accrue de 21 p. 100, soit de \$6,753,300 à \$8,146,300. De forts débarquements de poisson de fond et de hareng au cours de l'année ont amené ces résultats.

La prise de poisson de fond s'est accrue de 26 p. 100 pour passer de 61,358,000 livres en 1955 à 77,398,000 en 1956, et sa valeur pour les pêcheurs, de 14 p. 100 ou de \$1,581,700 à \$1,806,700. L'abondante migration de grosse morue, qui a eu lieu dans le golfe Saint-Laurent en 1956, a grandement contribué à augmenter les débarquements de poisson de fond. La prise de morue barbue et de perche rose a de beaucoup surpassé celle de 1955. La prise de hareng a été abondante, soit 71,443,000 livres évaluées à \$1,037,100 contre 55,443,000 livres et \$646,800 au cours de l'année précédente; cette augmentation a porté surtout sur le petit hareng ou "sardines".

La production de filets congelés et emballés s'est établie à 8,860,000 livres d'une valeur de \$1,553,600, comparativement à 4,873,000 et à \$1,170,700 l'année précédente. Les produits de poisson en conserve sont montés, dans la même comparaison, de 533,070 (\$4,035,800) à 909,471 caisses (\$7,366,200). La quantité de sardines en conserve, qui s'est élevée à 832,278 caisses de 20 livres (\$5,410,500), a presque doublé sur celle de l'année précédente.

Le matériel utilisé dans les opérations premières a atteint une valeur de \$9,304,100 en 1956 (\$9,642,800 en 1955) et les pêcheurs se sont chiffrés par 9,785 (10,066).

De lourds débarquements en Alberta en 1956

Dans cette province, la prise en 1956 s'est accrue de 10 p. 100 sur 1955 (9,641,000 livres contre 8,731,000). La valeur des débarquements est montée de 15 p. 100 (\$790,200 contre \$687,500) et la valeur marchande, de 14 p. 100 (\$1,305,900 contre \$1,143,500). L'augmentation est due principalement au rendement plus élevé des pêches de poisson blanc, laquelle n'a été que partiellement contrebalancée par la diminution des débarquements de doré commun.

La pêche a été particulièrement fructueuse dans le lac Wabamun. La prise de poisson blanc dans ce lac a atteint 1,056,000 livres pour une valeur débarquée de \$113,920 et une valeur marchande de \$233,000, au regard de 198,500 livres en 1955 pour des valeurs respectives de \$29,770 et de \$63,500. La prise au lac La Biche a également enregistré une forte augmentation. Par contre, les débarquements ont diminué au Petit lac des Esclaves où se trouvent situées les plus importantes pêches de la province. La diminution la plus importante a été celle des débarquements de doré commun au Petit lac des Esclaves, soit 117,600 livres d'une valeur de \$9,415 en 1956 contre 576,500 livres et \$53,206 au cours de l'année précédente.

Le matériel utilisé dans les opérations premières a été évalué à \$470,600 (\$656,200 en 1955) et le nombre des pêcheurs a été réduit de 5,247 à 4,277.

Les Territoires du Nord-Ouest enregistrent une pêche réduite en 1956

La prise dans les Territoires du Nord-Ouest en 1956 a diminué de 11 p. 100 sur 1955 (6,939,000 livres contre 7,827,000), et les débarquements de truite et de poisson blanc ont tous deux accusé une réduction. La valeur des produits a baissé de 3 p. 100 (\$1,482,900 contre \$1,529,300), mais la valeur des débarquements est montée de 6 p. 100 (\$787,400 contre \$742,000).

Le matériel utilisé dans les opérations premières valait \$754,500 (\$789,000 l'année précédente) et le nombre des pêcheurs est tombé à 575 (716).

Fort rendement des pêches du Québec en 1955

La valeur des produits de la pêche au Québec, en 1955, a grimpé de 33 p. 100 sur 1954 (\$6,675,100 contre \$5,002,100) pour atteindre le chiffre le plus élevé depuis 1946. La prise de poisson (129,192,000 livres) a établi un record et l'emporte de 40 p. 100 sur celle de l'année précédente. La valeur débarquée est montée de 18 p. 100, pour passer de \$2,930,900 en 1954 à \$3,452,600. C'est la pêche maritime qui a accusé cette hausse, due en grande partie aux lourds débarquements de poisson de fond.

La prise de poisson de fond a grimpé à 50,682,000 livres d'une valeur débarquée de \$1,282,500, comparativement à 38,856,000 livres et à \$873,500 l'année précédente. Cette augmentation est due en grande partie à l'accroissement de la flotte moderne de pêche de palangriers et de petits chalutiers. Ces bateaux ont également favorisé de forts débarquements de plie et de perche rose. La pêche du hareng a aussi donné un rendement très élevé aux Iles-de-la-Madeleine en 1955.

L'expansion des usines de filettage en 1955 a contribué à une forte production de filets emballés et blocs de poisson. La production totale de filets de poisson de fond est montée à 4,644,000 livres (\$779,100), contre 1,824,000 livres (\$216,800) l'année précédente. Les filets emballés et les blocs ont tous deux augmenté. La production de poisson salé, en 1955, a été aussi fort au-dessus de celle de l'année précédente.

Pour les pêches maritimes et intérieures, la valeur du matériel utilisé dans les opérations premières s'est élevée à \$4,247,000 (\$3,987,000 l'année précédente), et le nombre des pêcheurs, à 6,383 (6,272).

CANADIAN FISHERIES PRODUCTION, 1957

The yield of the Canadian fisheries in 1957 was significantly below that of the preceding year. However, it is noteworthy that the fishing results had been very gratifying in 1956 when an all-time record was established for the catch and its value. For the sea fisheries, the catch fell by 12 per cent to 1,816,315,000 pounds from 2,054,345,000 in the previous year; the value landed declined by 13 per cent to \$79,127,000 from \$91,340,000. The decline was much more pronounced in British Columbia than for the Atlantic Coast. Complete records are not on hand for the inland fisheries, but information available from the major producing areas indicates a slight decline compared with 1956.

There were heavy stocks of Pacific halibut and of salmon at the beginning of the 1957 fishing season and this had an adverse effect on prices. In British Columbia, the catch of herring was also drastically reduced, compared with the preceding year. On the East Coast the groundfish fisheries were curtailed, due - at least in part - to severe ice conditions which prevailed off the East Coast and in the Gulf of St. Lawrence in the early months of the year. Lobster fishing was also less successful than in 1956.

BRITISH COLUMBIA - The catch of fish and shellfish in British Columbia declined by 28 per cent in 1957, to 482,286,000 pounds from 674,392,000 in the preceding year and the value fell by 20 per cent to \$28,787,000 from \$36,066,000. Compared with 1956, prices were down for halibut as well as for chum, coho and spring salmon. The yield of the sockeye fishery was rather disappointing and the herring catch was very low.

The landings of herring declined to 293,585,000 pounds valued at \$4,352,000 from 491,396,000 pounds and \$7,077,000 in the preceding year. The January to March fishing operations for herring procured rather poor results, because of the cold weather and of the scarcity of fish. Summer fishing was very successful but in November and December, due to lack of price agreement between fishermen and processors for herring reduction purposes, the fleet effort in the herring fishery was conducted on a very limited basis and largely for food purposes. Consequently the herring oil production fell to 2,048,100 imperial gallons from 4,725,903 in 1956 and that of the herring meal dropped to 23,882 tons from 47,134.

The catch of salmon climbed to 128,803,000 pounds from 113,563,000 in the preceding year. However, the increase was accounted for by the pink salmon which is a low-priced variety. Other species were landed in smaller quantity than in 1956 and the price for a few of them, as mentioned above, was also reduced. As a result, the landed value of salmon fell to \$18,489,000 from \$21,355,000 in 1956. The sockeye fishery was adversely affected by the strike of the net fishermen from June 22 to July 13; in the following weeks the sockeye run was lower than expected and the average size was much smaller than during the cycle years. The pack of canned salmon was up to 1,443,267 cases from 1,118,279 in the preceding year. Most significant was the increase in that of pink to 751,048 cases from 363,633. The frozen salmon production dropped to 9,020,000 pounds from 14,106,000 in the preceding year.

The yield of the halibut fishery was also below that of 1956 and the catch was 21,102,000 pounds against 23,315,000 in the preceding year. The value fell more significantly to \$3,444,000 from \$5,067,000. Because of a substantial carryover of halibut stocks from 1956, the unit landing prices were sharply reduced in 1957. On the other hand, the other groundfish fisheries were successful and compared favourably with the 1956 results.

ATLANTIC COAST - The catch of fish and shellfish on the Atlantic Coast was down only slightly in 1957, compared with the preceding year, but the value fell more significantly. The landings declined by 3 per cent to 1,334,029,000 pounds from 1,379,953,000 in 1956 and the value fell by 9 per cent to \$50,340,000 from \$55,274,000. A reduced catch of groundfish as well as of lobster, compared with 1956, largely accounted for these results. As a counterpart and partially offsetting the decline, a heavy herring run materialized in 1957.

The landings of groundfish was 981,554,000 pounds, in 1957, valued at \$26,168,000, against 1,016,792,000 pounds and \$27,331,000 in the preceding year. The decline applied to nearly all species of major importance: cod, haddock, hake and redfish. A heavy take of halibut and of small flatfishes only partially compensated for the loss. Severe ice conditions off the East Coast and in the Gulf of St. Lawrence hampered fishing operations for groundfish in the first part of the year. In Northern

(Continued on page 23)

Le rendement de la pêche au Canada, en 1957, a été fort inférieur à celui de l'année précédente. Néanmoins, il convient de noter que la pêche avait été fort heureuse en 1956, puisque, cette année-là, la prise et la valeur débarquée ont toutes deux établi un record. En ce qui concerne la pêche maritime, la prise a diminué de 12 p. 100 sur un an plus tôt (1,816,315,000 livres contre 2,054,345,000) et la valeur débarquée, de 13 p. 100 (\$79,127,000 contre \$91,340,000). La réduction a été beaucoup plus marquée en Colombie-Britannique que sur la côte de l'Atlantique. On ne possède pas encore de données complètes relativement à la pêche intérieure, mais, selon les renseignements qui ont été fournis par les principales régions productrices, cette pêche a accusé un léger recul au regard de celle de 1956.

Le début de saison de la pêche, en 1957, ayant enregistré de lourds stocks de flétan du Pacifique et de saumon, il s'en est suivi une baisse du prix de ces espèces en Colombie-Britannique. Dans cette province, la prise de hareng a été considérablement réduite comparativement à l'année précédente. Sur la côte orientale, le rendement de la pêche du poisson de fond s'est contracté à cause, - du moins en partie, - de la situation rigoureuse due à la glace sur la côte et dans le golfe Saint-Laurent au cours des premiers mois de l'année. La cueillette du homard a également été moins heureuse qu'en 1956.

COLOMBIE-BRITANNIQUE - La prise de poisson et de mollusques et crustacés en Colombie-Britannique, en 1957, a baissé de 28 p. 100 sur 1956 (482,286,000 livres contre 674,392,000) et leur valeur de 20 p. 100 (\$28,787,000 contre \$36,066,000). Dans la même comparaison, les prix ont baissé pour le flétan, de même que pour le saumon kéta, le coho et le quinnat. Le rendement de la pêche au sockeye a été plutôt décevant et la prise de hareng a été considérablement réduite.

La prise de hareng est tombée à 293,585,000 livres (\$4,352,000) contre 491,396,000 livres (\$7,077,000) l'année précédente. Les travaux de pêche au hareng, de janvier à mars, ont donné de piètres résultats à cause de la température froide et de la rareté du poisson. La pêche d'été a été très prospère, mais, en novembre et décembre, à cause du désaccord entre pêcheurs et traiteurs sur le prix du hareng réservé aux sous-produits, l'effort de la flotte de pêche au hareng s'est restreint presque uniquement à la pêche pour fins alimentaires. En conséquence la production d'huile de hareng est tombée à 2,048,100 gallons impériaux (4,725,903 en 1956) et celle de farine de hareng à 23,882 tonnes (47,134).

La prise de saumon s'est élevée à 128,803,000 livres contre 113,563,000 l'année précédente. Toutefois, l'augmentation en était une surtout de saumon rose qui est une variété bon marché. Les autres espèces ont été débarquées en plus petite quantité qu'en 1956 et le prix de certaines variétés a baissé. En conséquence, la valeur des débarquements de saumon est tombée à \$18,489,000, au regard de \$21,355,000 en 1956. La pêche au sockeye a subi des contretemps par la grève - du 22 juin au 13 juillet - des pêcheurs au filet; durant les semaines subséquentes, la pêche au sockeye a été inférieure à ce qu'on avait prévu, et la taille moyenne a été fort inférieure à celle des années cycliques. La mise en conserve du saumon s'est élevée à 1,443,267 caisses contre 1,118,279 l'année précédente, et l'augmentation la plus marquée a été celle du saumon rose (751,048 caisses contre 363,633). La production de saumon congelé est tombée à 9,020,000 livres, contre 14,106,000 l'année précédente.

Le rendement de la pêche au flétan a également reculé par rapport à celui de 1956; la prise s'est établie à 21,102,000 livres (23,315,000 l'année précédente) et la valeur, à \$3,444,000 (\$5,067,000). A cause des grandes réserves de flétan de 1956, le prix unitaire du flétan a fortement baissé en 1957. Par ailleurs, les autres pêches de poisson de fond ont été heureuses et se comparent avantageusement avec les résultats de 1956.

LA CÔTE ATLANTIQUE - En 1957, la prise de poissons et de mollusques et crustacés ne s'est contractée que légèrement par rapport à l'année précédente, tandis que la valeur a subi un fléchissement plus accusé. La prise s'est allégée de 3 p. 100 pour n'atteindre que 1,334,029,000 livres contre 1,379,953,000 livres en 1956, mais sa valeur s'est amoindrie de 9 p. 100 (\$50,340,000 contre \$55,274,000). On attribue ce glissement en grande partie au déclin de la prise de poissons de fond et de homard, en comparaison avec 1956. Par contre, cette perte a été compensée en partie par une migration très forte de harengs en 1957.

La prise de poisson de fond s'est établie en 1957 à 981,554,000 livres (\$26,168,000), contre 1,016,792,000 livres (\$27,331,000) l'année précédente. Parmi les espèces importantes, presque toutes ont diminué, y compris la morue, l'églefin, la morue barbue et le saumon. Cette perte n'a été compensée qu'en partie par de bonnes prises de flétan et de petits poissons plats. La présence de glaces au début de l'année sur la côte et dans le golfe Saint-Laurent a beaucoup entravé la pêche au poisson de fond. Au nord de Terre-Neuve, la glace a empêché la pêche à la morue jusqu'en mi-juillet, et la pêche au piège à la morue a été fort retardée dans cette province et peu pratiquée cette année. Par suite des débarquements réduits de poissons de fond, la production de filets congelés a été fortement réduite au regard de 1956. Les filets emballés séparément (filets ordinaires) se sont chiffrés par 77,895,000 livres, contre

CANADIAN FISHERIES PRODUCTION, 1957

(Continued from page 2)

Newfoundland, ice prevented cod fishing until mid-July and trap-fishing for cod in this province was delayed and done only to a limited extent in the last year. Due to reduced landings of groundfish, the production of frozen fillets was substantially curtailed, compared with 1956. The packaged or "ordinary" fillets' production declined to 77,895,000 pounds from 95,489,000 in 1956. However, it is noteworthy that the production of fish blocks increased to 45,960,000 pounds from 39,641,000 in the preceding year.

Lobster fishing was not as successful as in 1956 and the catch fell by 15 per cent to 43,-703,000 pounds from 51,609,000 in the preceding year; its value was down by 20 per cent to \$14,265,000, due to a reduced catch and to lower prices from January to May and towards the end of the year as well. Ice conditions in the early months of the year also adversely affected this fishery, specially in the province of Newfoundland. The pack of canned lobster was much heavier than in 1956 but the quantity marketed alive or fresh boiled declined significantly.

During the last year, there was an abundant run of herring off the Nova Scotia Coast and in the Bay of Fundy. The total catch on the Atlantic Coast for 1957 reached 217,245,000 pounds valued at \$2,523,000, against 193,430,000 pounds and \$2,344,000 in the preceding year. This was reflected in increased exports of fresh herring, in a heavy production of pickled product and of bloaters as well as in a substantial pack of canned sardines. However, as a counterpart the run of other pelagic species, mackerel and alewives, was rather poor in 1957. The catch of mackerel declined to 18,676,000 pounds valued at \$740,000 from 21,938,000 pounds and \$827,000 in 1956. This fishery was almost a failure in the province of Newfoundland.

FRESHWATER FISHERIES - No complete record is presently available on the inland fisheries for the year 1957. However, information on hand from the main producing areas - Ontario, Manitoba and the Northwest Territories - indicated that the high level reached in 1956 was not quite maintained. This was also corroborated by the external trade figures on the inland species. Our export sales of freshwater fish were down somewhat in 1957 mainly for pickerel, perch and trout. A record catch of 124,600,000 pounds valued to fishermen at \$13,890,000 materialized in 1956.

Up to the end of November, the catch of fish in Ontario was reported at about the same level than in the preceding year. Perch and smelts were landed in greater quantity but this was counter-balanced by a decline for the blue pickerel, yellow pickerel and a few other species. Combined figures for the winter 1956-57 and the summer 1957 seasons at the Great Slave Lake indicated that the fisheries yielded at a level close to that of the preceding seasons. However, estimates obtained for the province of Manitoba showed for this province a decline of 9 per cent in quantity landed and of 13 per cent in value to fishermen. Yellow pickerel, sauger and tullibee landings declined significantly and the increase in the whitefish catch did not offset this loss.

STOCKS OF FISH AND EXTERNAL TRADE - The total reported stocks of frozen-fresh fish, at the end of the year, showed a substantial drop compared with those of a year ago. They were reported at 52,367,000 pounds, against 75,818,000 at the end of 1956, thus showing a decline of 31 per cent. The smaller production of packaged or "ordinary" fillets of groundfish on the East Coast as well as the reduced production of frozen B.C. salmon products was reflected in the year-end inventories. The combined stocks of groundfish fillets and blocks were down by 38 per cent to 11,562,000 pounds from 18,707,000 a year ago. Those of Pacific salmon as well as of halibut were also substantially reduced compared with 1956. The stocks of the freshwater species, reported at 6,992,000 pounds, were 21 per cent less than a year ago. Bait holdings dropped drastically compared with 1956.

The stocks of salted groundfish were reported lower than those of a year ago, but the pickled products were up. Those of pickled herring were more than twice those of 1956 and a substantial increase materialized in the holdings of bloaters.

The exports of fish and fishery products for the period January - November declined by 3 per cent to \$121,029,000 from \$124,714,000 in the same span of 1956. The export sales of the groundfish products fresh or frozen as well as salted were up somewhat; however, these gains and others were more than offset by reduced sales of canned salmon (sockeye and pink) as well as of fish meal and oil. The imports of fish and fishery products, for the period January - October, were down by 4 per cent to \$12,951,000 from \$13,435,000 in 1956, due mainly to smaller imports of Japanese canned salmon.

95,489,000 en 1956. Cependant, il est à remarquer que la production de blocs de poisson s'est élevée à 45,960,000 livres, contre 39,641,000 l'année précédente.

La pêche au homard a été moins bonne qu'en 1956 et la cueillette (43,703,000 livres contre 51,609,000) a diminué de 15 p. 100 sur l'année précédente, tandis que la valeur (\$14,265,000 contre \$17,853,000) subissait un recul de 20 p. 100, conséquence partielle d'une pêche moins lourde et d'un fléchissement des prix de janvier à mai et vers la fin de l'année. Pendant les premiers mois de l'année, cette pêche a également souffert des mauvaises conditions dues à la glace, surtout à Terre-Neuve. En comparaison avec 1956, il y a eu une forte augmentation des emboîtages de homard, mais par contre les expéditions de homard vif ou fraîchement bouilli se sont fort ralenties.

En 1957, il y a eu une excellente migration de hareng au large de la côte de la Nouvelle-Ecosse et dans la baie de Fundy. Pendant l'année, la prise sur la côte atlantique a atteint 217,245,000 livres (\$2,523,000), au regard de 193,430,000 livres (\$2,344,000) en 1956. Ceci a permis des exportations plus considérables de hareng frais, une production plus lourde de hareng saumuré et de craquelot, et un fort emboîtement de sardines. Par contre, la migration des autres espèces pélagiques (maquereaux et gasparots), en 1957, a été plutôt pauvre. La prise de maquereaux n'a atteint que 18,676,000 livres (\$740,000) au regard de 21,938,000 (\$827,000) en 1956. A Terre-Neuve, cette pêche a pour ainsi dire échoué.

LA PÊCHE EN EAU DOUCE - Actuellement, on ne dispose pas, pour l'année 1957, de données complètes sur la pêche en eau douce. Néanmoins, les détails que fournissent les principales régions productrices, - Ontario, Manitoba et Territoires du Nord-Ouest, - indiquent que le lourd rendement de 1956 ne s'est pas entièrement maintenu en 1957. Les chiffres du commerce extérieur relatifs aux espèces de l'intérieur viennent d'ailleurs corroborer cet indice. Au cours de l'année observée, les ventes canadiennes, pour exportation, de poisson d'eau douce ont quelque peu diminué, surtout en ce qui concerne le doré, la perche et la truite. En 1956, la prise (124,600,000 livres) avait été évaluée à \$13,890,000.

L'Ontario a signalé que, jusqu'à la fin de novembre, la prise de 1957 équivalait à celle de l'année précédente. La quantité de perches et d'éperlans a été plus abondante, mais ce surplus a été compensé par une réduction de la prise de sandre, de doré jaune et de quelques autres espèces. Les chiffres accumulés relativement à l'hiver 1956-1957 et à l'été 1957 au Grand lac des Esclaves indiquent que le rendement y a été fort semblable à celui d'un an plus tôt. Toutefois, d'après des estimations reçues du Manitoba, cette province aurait accusé un recul de 9 p. 100 dans la quantité débarquée et de 13 p. 100 dans la valeur de la prise. Les débarquements de doré jaune, de doré noir et de tullibi ont fort diminué, et cette réduction n'a pu être contrebalancée par la prise de corégone.

LES STOCKS ET LE COMMERCE EXTÉRIEUR - Les stocks de poisson frais et congelé avaient subi, à la fin de l'année, une diminution considérable (31 p. 100) sur une année auparavant (52,367,000 livres en 1957 contre 75,818,000 en 1956). La production réduite de filets de poisson de fond emballés séparément (filets ordinaires) et provenant de la côte orientale ainsi que la réduction des produits congelés du saumon de la Colombie-Britannique ont amené cette baisse de fin d'année. Les stocks globaux de filets et de blocs de poisson de fond ont reculé de 38 p. 100 (11,562,000 livres contre 18,707,000 un an plus tôt). Les approvisionnements de saumon du Pacifique et de flétan, également, ont sensiblement fléchi au regard de 1956. Les stocks d'espèces d'eau douce (6,992,000 livres) ont décliné de 21 p. 100, principalement à cause du recul des approvisionnements de perche et de doré noir. Les approvisionnements d'appâts sont très inférieurs à ceux de 1956.

Les stocks de poisson de fond salé sont inférieurs à ceux d'un an auparavant, tandis que les produits saumurés sont quelque peu supérieurs. Les stocks de hareng saumuré ont plus que doublé, et le craquelot a accusé une augmentation importante.

Les exportations de poisson et de produits du poisson, au cours de janvier-novembre, sont tombées de 3 p. 100 en comparaison avec 1956, soit de \$124,714,000 à \$121,029,000. Les ventes, pour exportation, de produits frais, congelés ou salés de poisson de fond se sont élevées légèrement, mais ces avances ont été plus que contrebalancées par la réduction des ventes de conserves de saumon (sockeye et saumon rose) ainsi que de farine et d'huile de poisson.

Les importations de poisson et de produits du poisson, durant janvier-octobre, ont baissé de 4 p. 100 en valeur (\$12,951,000 contre \$13,435,000 en 1956), à la suite de la diminution des importations de saumon japonais.
